

H. S. DIPLOMAS PRESENTED TO FORTY-FOUR SENIORS

LARGEST CLASS IN SCHOOL'S HISTORY

Dr. R. L. Kelley, President of Earlham, Delivers Able Address at Commencement Exercises.

STAR PERFORMERS NEEDED

State Schools Stand for Essentials of Good Government and True Citizenship.

Marked by brilliancy and splendor seldom approached in commencement exercises in this city, forty-four Seniors were formally graduated from the Shields high school Thursday night. The exercises were held at the Majestic Theater and were witnessed by hundreds of the relatives and friends of the class and patrons of the schools. The stage was attrac-

Supt. T. A. Mott.

tively decorated with cut flowers and greenery and large bouquets of roses were carried by the girl graduates. While the audience was assembling several beautiful selections were rendered by the Seymour Orchestra. After the invocation was pronounced by the Rev. H. R. Boech, pastor of the St. Paul Evangelical church, a musical number was given by the High School Chorus under the direction of Miss Adelaide Gasaway, supervisor of music. The appreciation of the audience manifested itself in a round of hearty applause.

The graduates who received diplomas were:

Honoree Henry Ackerman, Eleanor Ahlbrand, Ernest Leroy Amick, Jennie Elizabeth Bridges, Zetta Jane Brown, Esther Bush, William Ellsworth Byrne, Margaret Frances Byrne, Hazel Clark, Wilma Theresa Colemeyer, Philip Laugel Cordes, Raymond B. Craig, Josephine Margaret Cuddahee, Esther Lucile Doane, Ovo Donnell, Arthur Enos, Faye Everhart, Alice Rosella Fox, Mary Louisa Foster, Thomas Joseph Galbraith, Herbert Gallamore, Omer Watson Greeman, John P. Hagel, Minerva

Hazzard, Ray Earle Himebaugh, Gladys Johnson, Pearl Elizabeth Kaufman, Kathryn Davison Kessler, Cecil Charlotte Kelso, Inez Mary Kreinhagen, Mary Hawthorne Lewis, Everett Murray, Gertrude Kathryn Meyer, Grace Elizabeth Miller, Joseph Eugene Misch, Chloe Nevins, Lillian Mary Osterman, Ira J. Pomeroy, Amelia Schleter, Alice Saunders, Grahame Mead St. John, Charles Travis Trumbo, Bertha Marie Werning and Myrtle Kathryn Young.

The class address was delivered by Dr. Robert L. Kelley, president of Earlham College. He was introduced by Superintendent Thomas A. Mott, who referred to him as one of the most distinguished educators and teachers in Indiana and one who has done a great work for the boys and girls of Indiana.

Dr. Kelley spoke on the subject, "The Star Performer", and in a clear and able manner presented sound, wholesome advice to the members of the class and the high school students. He said that reference was usually made to the five pointed star and presented five thoughts or ideals for which the schools of Indiana are striving and which ought to have been attained by the Seniors.

The five points for which the schools of this state stand are: health, scholastic attainment, self-discipline, tactfulness and inspiration. Linking these, however, as the body of the star, is strong, Christian character, which is vitally necessary to success.

The speaker took up each of the points carefully and gave a number of illustrations under each subdivision.

Dr. Kelley declared that the idea as to what made a star performer had changed from what it was several years ago. He recalled that speakers at commencement exercises in the past would predict that some member of the class might become president of the United States or would occupy an important position in some other walk of life. He said the new idea did not require a star performer to become president, a senator or statesman, but it was necessary for him to do his work what-

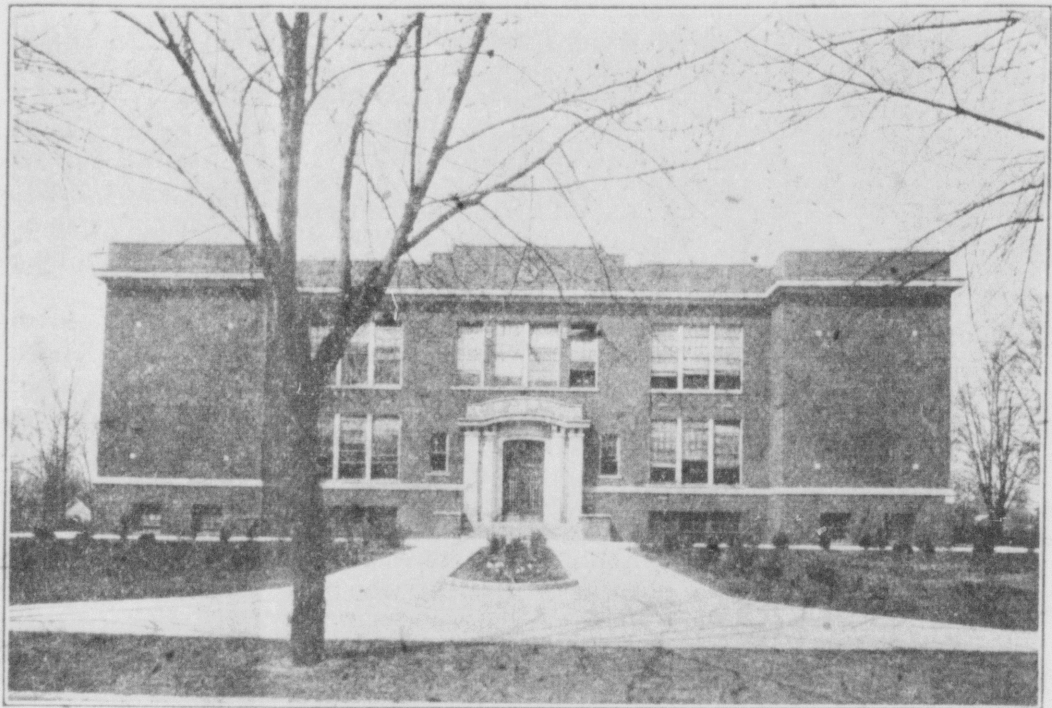

Kate Ferris Andrews, H. S. Principal.

ever it might be in a successful manner.

The speaker recalled that some when Edwin J. Jones was inaugurated president of Illinois Uni-

SHIELD'S HIGH SCHOOL.

PROPOSALS FILED BY CONTRACTORS

City Council Opened Bids Thursday Night for Improvement of Ten Blocks.

MAY AWARD CONTRACT MONDAY

Resolution Providing for Paving on Seventh Street is Adopted—Mayor Reads Veto.

Bids for the permanent improvement of ten blocks on Second and South Chestnut streets were received at the regular meeting of the city council last night. Proposals were filed by four contractors and bids were offered on but two materials, brick and cement concrete.

Three contracting firms filed bids for both concrete cement and brick. The bids for each firm were practically the same for the various contracts.

The Carter Construction Company, of Indianapolis filed the following estimates:

Medora brick or equal, per sq. yd. \$2.35
Sidewalk extensions, per sq. ft. .12
Portland cement, per sq. yd. 1.42
Combined curb and gutter, per ft. .55
Marginal Stone, per ft. .50
The bid of Charles H. Bergen, of Franklin was:
Medora brick or equal, per yd. \$1.85
Sidewalk extensions, per ft. .12
Concrete, per yd. 1.59
Combined curb and gutter, per ft. .50
Marginal Stone, per ft. .50
DeGolyer and Company filed the following bid:
Medora brick or equal, per yd. \$1.73
Sidewalk extensions, per ft. .10
Cement concrete, per yd. 1.37
In a few of the contracts the bidders made slight changes from the above figures.

The council referred the bids to the board of public works which will meet Monday night at 7 o'clock. The bids of DeGolyer & Company, of this city, appear to be the lowest.

Steinwedel offered a resolution asking the judge of the circuit court to appoint three disinterested freeholders to appraise the East Side Park, known as the automobile site, with the view of selling the ground to the

CHILD ESCAPED SERIOUS INJURIES WHEN HIT BY AUTO

Three-Year-Old Son of Mr. and Mrs. Fred Sciarra Struck by Dr. N. G. Harrod's Machine.

Carmine, the three-year-old son of Mr. and Mrs. Fred Sciarra, North Chestnut street, was painfully but not seriously hurt, about 8 o'clock Thursday night when he was hit by an automobile driven by Dr. N. G. Harrod, of Tampico. The child and his brother, two years older, had been left for a moment in front of the house and started across the street towards the pump.

Dr. Harrod saw the older boy run rapidly across the street and slowed down his machine, but just as the automobile approached the younger child he suddenly jumped in front of it and was thrown to the street. Had the machine been moving rapidly the child would probably have been more seriously injured. The machine was stopped within a few feet of where the accident occurred.

The baby was rendered unconscious but was soon revived. The physicians say his injuries are not serious.

FABIUS GWIN PLEADED NOT GUILTY IN FEDERAL COURT

Other Shoals Residents Indicted by U. S. Grand Jury Pleaded Guilty.

By United Press

Indianapolis, May 29.—Fabius Gwin, Democratic leader in the Second congressional district, pleaded not guilty today to the indictment filed in the Federal court charging him with complicity in the conspiracy to defraud the government by false civil service examinations.

All the other residents of Shoals and Martin county were indicted on the same charge pleaded guilty. The case has attracted wide attention throughout the state as the secret service men say that it was one of the best attempts to defeat the ends of the civil service regulations that have come to the attention of the court for years.

THOUSANDS ON WAY TO THE SPEEDWAY

Trains and Traction Cars Crowded With Passengers to Indianapolis Who Will Witness Races.

MANY TOURING PARTIES HERE

Decoration Day Ceremonies Will be Conducted in Seymour Under Direction of G. A. R. and W. R. C.

All roads today lead to Indianapolis. In other words thousands of people are enroute to the Indiana capital to witness the Speedway events on Decoration Day. All northbound trains and traction cars during the day have been crowded and scores of dust covered automobiles have passed through the city. The morning northbound Pennsylvania train was so crowded that it was necessary to couple on another coach at Columbus. Extra coaches were carried but the crowds even succeeded the prediction of the railroad officials.

Many local people went to Indianapolis today and others will follow on the early morning trains Saturday. Quite a number of automobiles drove their cars to the city and tourists say that the roads in this vicinity are lined with automobile parties all headed in the same direction.

The customary exercises will be conducted here tomorrow. The ceremonies will be in charge of the G. A. R. and W. R. C. organizations and the public meeting will be held at the Majestic Theater at 2 o'clock. The veterans and the Relief Corps members will meet at their hall at 1 o'clock and march to the theater in a body. The Redington band will furnish the music for the day.

The address will be given by James S. Campbell, of Crothersville. He was selected as the speaker because of his ability and also because he served as a soldier in the Union army. The music at the meeting will be furnished by a male quartet. Rev. E. L. Pettus, pastor of the Christian church will read Lincoln's Gettysburg address and will also pronounce the invocation.

After the conclusion of the Memorial exercises.

STEAMER SINKS; 700 PASSENGERS BELIEVED LOST

Empress of Ireland Goes to Bottom After Being Rammed by Collier During Heavy Fog.

HUNDREDS OF SURVIVORS ARE PICKED UP BY RESCUE BOATS

S. O. S. Calls Are Sent Out by Wireless But Assistance Arrived After Boat Went to Bottom.

Quebec, May 29.—More than seven hundred passengers on the big steamship, Empress of Ireland, were lost about 5 o'clock yesterday afternoon when the vessel was rammed by the collier Storstad in a heavy fog. The Empress of Ireland sank in a few minutes after the collision. The Storstad, badly damaged, proceeded under her own steam to Quebec. Reports as to the number of lives lost are conflicting. Between three and four hundred survivors were landed at Rimouski, and the Storstad has about three hundred and fifty on board. The Empress of Ireland carried 1,437, including 650 officers and men.

At 11 o'clock 677 persons were unaccounted for.

Alexander Matier, of Indianapolis, Mrs. Charles Gray and daughter and Mr. and Mrs. George Richards, of Terre Haute, and Miss Florence Bawden, of Hillsboro, Ind., were passengers on the ill-fated vessel and have not been accounted for.

A message received at Montreal by the Canadian Pacific offices from Rimouski said "all the passengers have been picked up by the boats of the Lady Evelyn and Eureka."

A similar message was received by La Patrie, a French newspaper at Montreal from a Rimouski correspondent. He said that four hundred survivors had been landed and that the Lady Evelyn and Eureka were going back to pick up the remainder of the passengers who were in boats.

The foregoing information does not agree with previous dispatches in the matter of loss of life. From the wording of the Canadian Pacific message it could not be determined whether "all the passengers" meant all those on board the Empress of Ireland or simply all those who were able to make the life boats.

The Empress of Ireland was a twin screw vessel of 14,191 tons. She was built in Glasgow in 1906 by the Fairfield Company, Ltd., and was owned by the Canadian Pacific Railway Company. She carried a full wireless equipment.

The Storstad registered 6,028 tons. She was built by the Armstrong-Whitworth Company, at Newcastle, in 1911, and her owner is the Dampsk Aktieselsk Maritime Company, of

LASTING PEACE IS WILSON AIM

Would Stand Sponsor For New Regime In Mexico.

PLANS A "MORAL INVASION"

No Intention of Recalling Troops Until Problem Is Solved—Possibility of Elections Under American Supervision, as In Cuba, Is Admitted—Reforms Insisted Upon.

It is not only the plan and policy of the president to adjust the present Mexican difficulty, which is looked upon by the administration as transitory, from the broader point of view, through the mediation, the results of which he will endeavor to compel the Constitutionalists to accept, but it is also a prime feature of the whole plan to use the influence and even the armed forces of the United States to bring about the establishment of a government in Mexico which will carry out the reforms Mr. Wilson considers necessary to lasting peace.

The administration has determined upon a more important invasion of Mexico than that which has taken place, adds the New York Tribune's Washington bureau. It is to be a "moral invasion," and its permanency is measured only by the time it will take for the Mexican people, particularly the handful of political leaders in control, to adjust themselves to the situation.

The troops, it is stated on highest authority, will remain in Vera Cruz until the establishment of a provisional government in Mexico City, and in all likelihood until there is an election and the establishment of a permanent government.

Possible Result Like That In Cuba.

That the administration now recognizes that complete intervention, the occupation of the country and the holding of elections under American supervision, as in Cuba, may grow out of the present situation is admitted in high quarters, although every effort will be made to avoid this.

The administration hopes that the Constitutionalists will prove amenable to reason and that they will, when they control the government, carry out the reforms which will work for permanent peace. In some quarters it is believed that the new "Constitutionalist" government will not find itself able to do as desired. If this is the case the United States will intervene, asserts the Tribune's authority.

The United States government intends not only to see to it that honest and fair elections are held in Mexico, but also to stand sponsor for the pledges that the party which achieves success will be required to make.

The United States government hopes that through the alliance with Latin American nations it can exercise its influence in Mexico for many years to come without incurring the animosity of Latin American countries.

Kind of Government Wilson Wants.

On the eve of possible accomplishments at the mediation conference at Niagara Falls it was made clear that the president aims at the one important achievement—the establishment of a permanent and constitutional government in Mexico pledged to carry out the reforms, notably agrarian, which Mexico needs.

When the time comes for the formation of a provisional government, if ever it comes, the idea of the administration is that there should be a commission government, composed of either neutral members or of representatives of all factions. One of the great obstacles is recognized to be the difficulty of obtaining neutral members, as almost every one of importance and ability in Mexico is allied with one faction or another. Another obstacle is that the Constitutionalists will not accept any government other than one of their own making.

That President Wilson apparently took direct charge of the negotiations in Niagara Falls was indicated when a telegraph line from the quarters of the American mediators was run to the White House.

BURROUGHS ON LONGEVITY.

Naturalist, Now Seventy-seven, Spends Hour Daily In a Horizontal Position.

John Burroughs, the famous naturalist, who has just celebrated his seventy-seventh birthday anniversary, says:

"People should watch their diet, take as much exercise and rest as they can and abstain from stimulants. Most old persons die of defective elimination, whereas if they would follow a few simple rules it would be the exception for a man to die before he was seventy-five.

"I do more work in a year now than I could thirty years ago. Every day I make it a point to spend at least one hour in a horizontal position. Lying down in the middle of the day or of the working period conserves the energy of the heart to a degree which I believe adds years to one's life.

"I abjure not only spirituous liquors, but coffee and tea, which are almost equally intoxicating beverages. I think tobacco is injurious, but it has a beneficial effect, which measurably counteracts the injury, in that it has a disinfecting property."

POSTAGE STAMPS OF EVERY DENOMINATION FOR EXHIBIT

Washington Collection Finest In the World With One Exception.

The \$100,000 collection of postage stamps that for years has been gathering dust in the archives of the postoffice department is being arranged and classified for exhibition at the National museum. J. B. Leavey, government philatelist, and T. T. Belote, head of the museum's division of history, expect to have the exhibit in permanent shape within about a year.

Officials of the museum and the postoffice department say the only collection of stamps which excels in completeness the one now being arranged is that owned by the British museum.

There are specimens of every variety and denomination of stamps ever issued by this government, as well as a collection of practically all the stamps ever used by any government since the use of postage stamps began. Included in the collection are specimens of the original British stamp of the forties, which was as large as an ordinary envelope of today, as well as the sizes issued in later years.

So far only nineteenth century issues and about \$10,000 worth have been put on exhibit. A novel case, consisting of scores of sliding vertical sections, all locked with one key and absolutely air tight, contains the stamps. The idea was taken from the British museum, but the cases are a great improvement on those there employed.

Among the most valuable stamps in the collection are the Franklin carrier stamp of the forties, which brings \$100; the "Type I" of 1851, whose faded square inch of paper is valued at \$200, and the one cent type of the same year and like value.

"The value that attaches to a stamp," said Mr. Leavey, "is determined very queerly sometimes. A misprint, a recalled issue and historic association bring up the worth of a stamp to amazing figures in a few years. Intrinsically they have no value. If stamp collecting fell into disfavor all over the world a good many paper fortunes would vanish at a blow."

COULDN'T BOSS BRADLEY.

Kentucky Senator Told Hanna One Way Was as Far as Another.

Work and persistency marked the life of the late United States Senator William O. Bradley of Kentucky from the time he first began to rise.

There was a time in his early struggles when he slept in his law office and had only one suit of clothes. When he was laughed at for his aspiration to be the Republican governor of his state his answer was to "Work and persevere," and he was elected—elected as the first Republican governor that Kentucky had ever had.

When he left Louisville to go to Washington to take the oath as senator he said that he was going to have the tariff schedule on hemp increased and he was going to have the tax removed from leaf tobacco. Again every one laughed. But he made good his assertion.

Once when Mark Hanna wanted Bradley to come to Washington for a conference because the national administration did not think he was running things right he wired Mr. Hanna that it was as far from Frankfort to Washington as it was from Washington to Frankfort.

BECKER CASE CHRONOLOGY.

July 11, 1912.—Herman Rosenthal, New York gambler, publicly accuses Charles Becker, lieutenant of police in New York, of graft.

July 16.—Rosenthal murdered at 1:57 a. m., in front of the Hotel Metropole, New York.

July 17.—Shapiro and Libby, owners of "gray murder car," arrested. They say Jack Rose hired the car.

July 18.—Rose surrenders and is held for murder.

July 21.—"Bridge" Webber arrested and held for murder.

July 22.—Harry Vailon surrendered and held for murder. District Attorney Whitman names the four gun men as actual killers.

July 25.—"Dago Frank" arrested.

July 29.—Rose, Weber and Vailon turn state's evidence, accuse Becker of instigating murder, which they procured. Becker arrested just before midnight.

Aug. 1.—"Whitey" Lewis arrested.

Aug. 5.—Becker formally pleads not guilty.

Aug. 10.—Sam Schepps arrested as witness at Hot Springs, Ark., and returns voluntarily.

Sept. 14.—"Gyp the Blood" and "Lefty Louie" arrested.

Oct. 7.—Becker's trial begins.

Oct. 24.—Becker found guilty of murder in the first degree.

Oct. 30.—Becker, sentenced to die during week of Dec. 9, 1912, put in Sing Sing death house.

Nov. 19.—Four gun men convicted of first degree murder.

Dec. 1.—Becker appealed from conviction.

Feb. 24, 1914.—Becker's conviction set aside; new trial ordered. Gun men's case affirmed.

April 13.—Gun men executed.

May 6.—Becker's second trial called.

May 22.—Becker convicted the second time of first degree murder.

NEW WAR PLANS MADE NECESSARY

Mediation Move Responsible For Changed Program.

LITTLE FAITH IN ARMISTICE

Original Scheme, Which Was to Fortify Plateau at Vera Cruz In Preparation For Advance to Mexico City, Has Been Upset—Toughening Recruits During Suspension of Hostilities.

Exactly what the war department at Washington thinks of the Mexican situation has been learned in the customary unquotable roundabout way that is nevertheless authoritative and designed, says the New York Tribune.

The national guard will be mobilized very soon.

The war department believes the armistice is bound to fail.

Plans for invasion of Mexico that it took four years to perfect have been wiped out by the enforced delay brought on by offers of mediation. These offers came just as the swift execution of strategical moves plotted by the war department was about to begin.

Other plans on a different basis, says the Tribune, are being worked on—plans that would not have been considered if the army had moved at once from Vera Cruz.

According to an officer high in authority and in close touch with Washington, diplomacy has upset preparations for Mexican invasion so badly that it will take two months to do the next best thing.

Vera Cruz a Pesthole.

The war plan made by Major General Wood and his staff elected Vera Cruz as the point of invasion and almost entirely eliminated operations from the border. The idea was to get out of Vera Cruz as rapidly as possible, the sanitary engineers having marked the place as a pest hole, and to take up a position on a plateau 2,000 feet high and about 50 miles from Vera Cruz.

Using Vera Cruz as a base, the army was then to hold the line of communication back to the seaport and so fortify the plateau that it would be impregnable. Division after division was to be brought up to the plateau, ready for advance on Mexico City.

So quickly was the A. B. C. mediation begun that the army did not have a chance to execute the move. Instead, the troops are bottled up in an insanitary city in the lowland climate, totally unsuited to Americans. Outposts have been allowed only twelve miles from the city. If the original plan had been executed the bridge blown up twenty-eight miles out of Vera Cruz would have been safe. As it is, however, army engineers who know exactly how the bridge was constructed reported that it can be replaced by pontoons without great delay.

In the belief of the war department, all the bridges from Vera Cruz to the City of Mexico are mined.

Until the militia is ready the regulars along the border will not advance on Mexico. Army officers laughed at the idea printed recently, on supposed expert information, that the national guard might be sent directly to Texas and trained there.

Militia to Be Toughened.

Staten Island has been laid out as a scene for daily skirmishes and war games of an elaborate nature by the New York troops. The militia's "seasoning" is anything but soft, as prepared by the regular army officers. It calls for the carrying of fifty-six pound packs on the backs of citizen troops, who will be marched and counter-marched in the hot sun until every ounce of useless tissue in them is gone and the remainder toughened into regular army elasticity. Two months of this seasoning, army officers believe, would transform clerks into cowboys in embryo, at least.

When ready and fit the militia will wait for the regular army to move and will follow them as a reserve. Meanwhile the regular army is being recruited to war strength, of 150 men to a company.

If the present force in Mexico under Funston were to advance as conditions are now the war department is not confident that it would not meet with reverses. The Mexicans have had three years of hard training in the field and know guerrilla warfare.

If the army goes into Mexico now it is the intention of the war department to use at least 75,000 men. The delay that came with mediation and caused a change of plan will be used to harden recruits.

No hope of stable government in Mexico is held by the army. It believes Carranza cannot control the country, and it does not trust Villa.

Training Elephants a King's Hobby.

A little while ago King Ferdinand of Bulgaria invested in four elephants, and now he spends all his spare time teaching his giant pets all that an educated elephant is required to know. The four beasts are housed at a farm on the outskirts of Sofia, and every day King Ferdinand spends an hour or so with them. Not only do the pachyderms recognize their royal master when he visits them, but they can do several simple tricks at his bidding.

CHIROPRACTIC

(Ki-ro-prak-tik)

Is the science of adjusting the subluxations (displacements) in the spinal column, commonly called back bone, for the purpose of removing the pressure from impinged nerves. The spinal column is the only place where nerves pass between two hard, bony, movable surfaces; therefore, it is the only place nerves can be impinged or the nerve supply restricted, and it matters not what part of the body or organ is affected, the cause is in the spinal column.

We simply analyze the spine and tell you where you are affected. Chiropactic is the only science that removes the cause of disease. No drugs, no pain, no knife. We use nothing but our hands, and the whole object is accomplished when the nerves are released. Paralysis, deafness, loss of voice, catarrh, gall stones, overweight, rheumatism, appendicitis, neuralgia, neurasthenia, epilepsy, St. Vitus dance, eye, ear, throat, lungs, stomach, liver, kidney, bladder trouble, etc., all quickly and permanently disappear under Chiropactic adjustment, properly given. We remove the cause of disease and nature cures. Analysis and consultation free. Investigation costs you nothing and means your life, health and happiness.

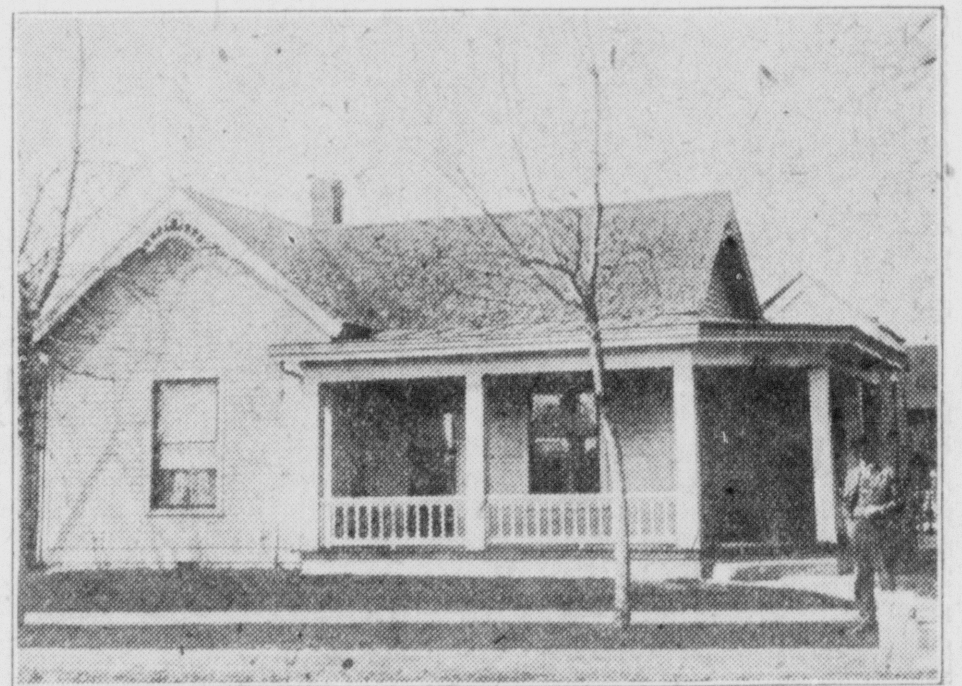

Have you sought health with no permanent results and now pronounced incurable? If so investigate Chiropactic.

MERITED PRAISE GIVEN SEYMOUR PUBLIC SCHOOLS FOR EFFICIENCY

Local Educational System is Conducted Under Competent Supervision and
Receives Recognition Throughout Indiana—Many Important
Changes and Improvements Made During the Last Year.

SIX-YEAR PLAN PRONOUNCED A SUCCESS

New Method Inaugurated by Superintendent T. A. Mott Whereby High
School is Extended to Include Seventh and Eighth Grades Attracts
the Interest of Educators—Public Pleased with Results.

Within a year after Seymour was building a grade school is also con-
founded, the public spirited citizens, ducted for the accommodation of the
realizing the necessity of providing children living within the prescribed
educational advantages for the district.

The school system of Seymour has
always maintained a high standard of
a school. As no building suitable for work and for years its graduates have
the purpose was available, Meedy W. been admitted to the best colleges and
Shields, the founder of the town, universities without examination.
built a combined school house and Recently, however, the schools of
church at what is now the corner of
Ewing and Fifth streets. The build-
ing was frame and contained three
rooms. The one on the second floor
was used for religious services and
the two lower rooms were equipped
for school purposes. While the build-
ing was crude in construction it met
the demand for the time and was
considered one of the best school houses
in the vicinity.

When this building was erected it
was believed that it would be large
enough to accommodate the town for
a number of years, but the growth
of the new settlement was more rapid
than anticipated and soon the two
rooms were overcrowded and con-
sideration was given to additional fa-
cilities. From that time until 1860
other rooms in various localities were
rented and converted into class
rooms. From the founding of the
town much interest was shown in the
schools and the citizens have readily
responded to any movement for the
betterment of the educational sys-
tem.

First Building Burned.

The first building was destroyed by
fire June 9, 1859, and immediately
preparations were made for the con-
struction of a new, two-story build-
ing. At the time this was planned al-
lowance was made for the growth of
the town and the new building was
convenient and commodious. Within
a decade, however, the quarters were
again so crowded that other arrange-
ments were needed.

Again the founder of the city of-
fered aid and donated one block, the
present site of the Shields high
school building. The main portion of
the building was used for many years
having been opened for the admission
of pupils in 1870. It contained six
large rooms, and despite the past ex-
perience with overcrowded condi-
tions, there was some censure of the
trustees in building such a large
structure, as there was apparently no
need for it. Their judgment proved
wrong, however, for in five years the
attendance was so large that it was
necessary to build an addition. The
south wing of the old building was
erected at a cost of about \$10,000.

In 1875 a comfortable building was
erected in the west part of the city
for colored children and is still in
use. Good as the school facilities
were they were found to be inade-
quate again in a few years and in
1881 the first ward building, Laurel
street school, was built. The old
records show that the school enu-
merations increased from 875 in 1872
to 1,528 in 1881.

The Park school was built in 1885
and several years afterwards the
Third ward school was erected.

New High School.

After years of service the Shields
high school building became inade-
quate and in 1910 the present high
school building, modern in every re-
spect, well arranged and lighted and
fully equipped, was erected. At this

Well Balanced Course.

At all times an effort has been made
to keep the school course well bal-
anced, so that every department will
receive the attention it merits. This
idea has been successfully carried
out with the result that while the new
practical courses have been estab-
lished, the training and instruction
necessary for those who expect to
follow the professions have not been
slighted. At the present time the
school officials and authorities en-
deavor to provide such a course that
the pupils will receive a training cov-
ering a wide scope and at the same
time be afforded an opportunity to
specialize in the subject or
subjects in which they are especially
interested or along the lines in which
they have exhibited native ability. The
most successful high schools of the
United States are being conducted in
this method and the local system, it
is predicted, will soon reach a rank
second to none in Indiana.

Conducted as a Unit.

All the schools in the city are being
conducted as a unit and the same high
standard of work is maintained at
the various buildings. At the present
time the different classes are in charge
of a competent and efficient corps of
thirty-three teachers. It is to their
credit that they are deeply interested
in their work and take pleasure in
witnessing the improvement of the
system as a result of their work and
efforts. In all departments there is
the harmony and co-operation so
essential to a perfect system.

During the year that Superin-
tendent Thomas A. Mott has been in
charge of the public schools they
have made a marked forward
step and he has proved his abili-
ty as an executive officer as well as
an educator. During his term as su-

Freshman Class.

ments of the last state legislature
and in keeping with the new idea of
providing practical subjects a voca-
tional training department was estab-
lished in the local schools the first of
this year and has become very popu-
lar. From the time the classes were
first organized many students were
enrolled and have manifested a
marked interest in the subjects.
Further emphasis will be placed upon
this department and during the next
year it will be enlarged and improved
to meet the demands.

One of the most popular subjects
of the vocational training department
is cooking. The classes are held in
the basement of the high school build-
ing where a complete equipment may
be found. A number of gas burners
have been arranged on a long table
and the pupils are given practical in-
structions how to prepare various
articles of food for the table. A
large gas oven was also purchased
and is used for baking bread, pies,
cakes and for preparing meats and
other articles which cannot be pre-
pared over the small burners.

Although this instruction is given
thoroughly the idea of economy is
carried out in the equipment. Re-
cently several superintendents from
surrounding high schools visited the
local schools especially to inspect the

The parents have realized the worth
of this department and have urged
their daughters to take advantage of
the course so that they might acquire
the fundamental principles of the
work of which they will be in com-
plete charge in their own homes a
few years later.

Through the domestic science de-
partment of the public school system
household duties have been elevated
from the plane of laborious drudgery
to a science. It has been found that
an adequate equipment in the kitchen
can be purchased for almost the same
amount that is expended for unneces-
sary furniture and that the work can
be made a pleasure. Just how this
can be done to the best advantage is
one of the purposes of the domestic
science department. Contrary to the
belief of many, the training is not
limited to cooking but covers the
wide scope of household efficiency
with the aim of creating a greater in-
terest in the several tasks of home-
life.

A large number of girls are also
enrolled in the sewing classes. Plain
sewing is taught the pupils of the
eighth grade and more difficult work
is assigned to the advanced pupils.
This course is a part of the voca-
tional training plan and meets with
the approbation of the parents. Many
of the girls in the high school are now
able, because of the instruction given
in the sewing department, to make
their own dresses, and find the work a
pleasure.

Scientific Farming.

At this time scientific farming is
receiving wide attention and the sub-
ject has not been overlooked in the
local schools. The subject has been
placed under the supervision of a

valuable in an agricultural commu-
ity, such as this, where many of the
high school students live on farms
and are directly interested in better
farming. It is the intention of the
authorities to further encourage the
study of this subject among those
who expect to gain their livelihood
by agricultural pursuits by providing
a more complete course next year.

Manual Training Work.

Manual training is also taught in
the high school and special attention
is given to wood working. Boys with
a mechanical turn of mind can con-
struct such articles as they desire
and are taught how to use the various
tools with more skill.

The Seymour schools have a high
rating on their vocational training
department although this is the first
year that a special effort has been
made to interest the pupils in the var-
ious departments. Like other new
courses they will be enlarged and im-
proved as the demand arises and such
additional equipment will be pur-
chased as is needed.

Six-Year Plan.

During the last year a number of
progressive moves have been made
for the general improvement of the
educational system, but what is re-
garded as the most important is the
reorganization of the high school de-
partment and the establishment of
what is known as the "six-year
plan," so that it would include the
seventh and eighth grades. Thus the
Seymour high school embraces the
six upper grades of the complete
school course. The two lowest
classes are designated as the "Jun-
ior" high school and the Senior, Jun-
ior, Sophomore and Freshmen classes
are in the "Senior" department.

The local schools have the distinc-
tion of being the first in the state of
Indiana to adopt this method and
consequently the results are being
watched closely by educators who
have given it careful attention. In
this connection it is interesting to
note that at a recent meeting of the
National Council of Educators the

MERITED PRAISE GIVEN
SEYMOUR PUBLIC SCHOOLS
FOR EFFICIENCY

(Continued from page 3)

plan was presented and highly recommended.

In speaking of the plan Superintendent Mott says:

"The high school thus organized has an enrollment of over four hundred students and a faculty of specially trained teachers numbering fourteen. The work of the school is all planned on the departmental

organization, and the enthusiasm of numbers has given to all the work a new zest. The plan extends to the pupils of the seventh and eighth grades the benefit to be had from the special teachers of the high school as well as the good that comes from the high school plan of promoting all students on the basis of individual 'subjects' rather than by 'grades', which is necessary in the elementary grades."

"The age of twelve or thirteen, the average age of seventh-year pupils, in most cases marks the beginning of the age of adolescence, when childhood changes to youth, when profound changes occur in the lives of children both physical and mental. This change is marked by new feelings, new interests, new tastes, and by the development of powers of self-direction and of individuality. The attempt to crowd all children through a uniform course of study at this age, or the attempt to adopt a course of study to fit the 'average child', as

or legal standpoint. Under the plan of making this change at the end of the eighth grade the age is the same as that which the compulsory education law names as the time when pupils may stop school. Parents and children are thus confirmed in the idea that an elementary education is all that is needed. The break between the elementary and the high school at the close of the eighth year suggests leaving school and makes it easier.

"Under the present plan in the Seymour schools making this change at the close of the sixth year of school, the child is initiated into high school work before the law permits him to stop school, and when his mind is best prepared for the change.

Wiseest Adjustment.

"The six-year plan favors the wisest adjustment of school facilities to the resources and revenues of the community. High school facilities in any community are the most costly element of the school system. This six-year high school extends these opportunities for secondary education to the largest number of students possible at the least cost per capita. It eliminates waste in the teaching force, in buildings, and in equipment, and extends our best educational facilities to the largest possible number."

In speaking of the work for next year, Miss Andrews, the high school principal said:

"Before the work of this year is

broad elective course in the upper grades arouses interest and allows the earlier development of special inclinations.

"A number of new features, such as longer recitation periods and study under the supervision of the instructor teaching that subject, more laboratory work and improvements of various kinds will be introduced."

H. S. DIPLOMAS PRESENTED
TO FORTY-FOUR SENIORS

(Continued from first page)

versity he conferred an honorary degree of Doctor of Agriculture upon a farmer who was an expert in his line and who had inspired his neighbors to cultivate the soil in a scientific manner so that larger returns could be derived. He said that at this time he was impressed with the thought that there could be a star performer on the farm.

Dr. Kelley said that although no girl in the class might become the

star performers and that every young man and woman who entered upon life's duty should make it a point to do their work whatever it is just a little better than it has ever been done in the past. Indiana's schools are equipping its pupils to become star performers, the speaker said, but the attainment of success depends largely upon the individual. Every young man and woman is tested for the qualifying points and must possess them before they can hold their own in the rushing wave of modern business activity.

One of the principal secrets of success is to conserve and care for the body, the speaker said. "There is not much opportunity for a boy or girl who does not have sense enough to care for himself. The work is done today by men and women of strong physical capacity. I have seen men in the great commercial centers of this country go down to defeat in five, six, seven or eight years, because they were not physically able to stand the strain. They were compelled to give way to younger men who were stronger and who could fill the positions."

A young man is everlastingly handicapped if he does not have brains enough to care for himself, the speaker exclaimed. He spoke of the wonderful endurance of Charles Warren Fairbanks, who visited forty states and spoke several times in each state while campaigning during

there was not much opportunity for a student who did not do one thing and do it well. Perfection should be the goal in the work no matter what task was undertaken. He gave an illustration of a physician who called upon a professor of physics to repair an electrical machine which was out of order. Several patients were waiting in the office for treatment and the doctor offered \$50 to have the machine repaired. The professor, who had become efficient in his work found the trouble without difficulty and accepted in payment a check for \$25. The speaker said there were two reasons why the professor should have accepted the amount offered. First, he had spent many times \$50 in learning how to do the work, and secondly, the reputation of the physician was at stake and it was worth that amount to him to have the machine repaired. The schools of Indiana stand for scholastic attainment, Dr. Kelly said:

"Educational training also equips the student to analyze the situations confronting him and increases his capacity to solve the great problems."

The best disciplined men and women today are those who have attended school, for there they learn how to do the work the best. The speaker added, however, that self-discipline might be acquired outside the school room but the student who did not attend school was placed at a disadvantage because he did not receive the help and assistance of the teachers. Self-discipline was the third point of the star.

The fourth point was common sense or tactfulness. The speaker said this could not always be received in the school rooms and depended upon the individual. Many students have power but do not know how and when to apply it. A successful student must know how to utilize the power they have and must also conserve it.

The fifth point of the star was inspiration. The schools of this state are sources of inspiration, he said, as the students are given the best thought of the world's greatest men

(Continued on page 9, column 1)

basis, and the methods of the secondary school adopted throughout. Under this plan we have a complete six-year high school working as one body, with one corps of teachers and in one organization. Recitations are all heard in the class rooms and laboratories, and the large study rooms are at all times quiet where students who are not busy in recitation may study.

No Break in Course.

"Pupils enter the school at the beginning of the seventh year and graduate at the end of the twelfth. There is no break in the course. The old gap between the eighth and ninth year, at which time so many pupils stop school, is entirely closed as conditions of method and management are the same throughout the course and no more new branches are begun at the beginning of the ninth year than at any other time of the course. When a pupil enters the high school there is no reason, so far as the organization of the school is concerned, to stop the work at the end of any particular year.

"The regular high school management extends throughout the school. The high school facilities of library and laboratory are open to all the pupils. Seventh and eighth grade girls receive instruction in domestic art and domestic science in the high school laboratories under the instruction of the regular high school teachers. High school teachers of Latin and German teach the eighth grade classes in Latin and German.

"This plan has nearly doubled the number of pupils in the high school

seems necessary in the elementary schools, is fatal to the best interests of many children, both those who are naturally slow as well as those who have proved themselves to be exceptionally strong.

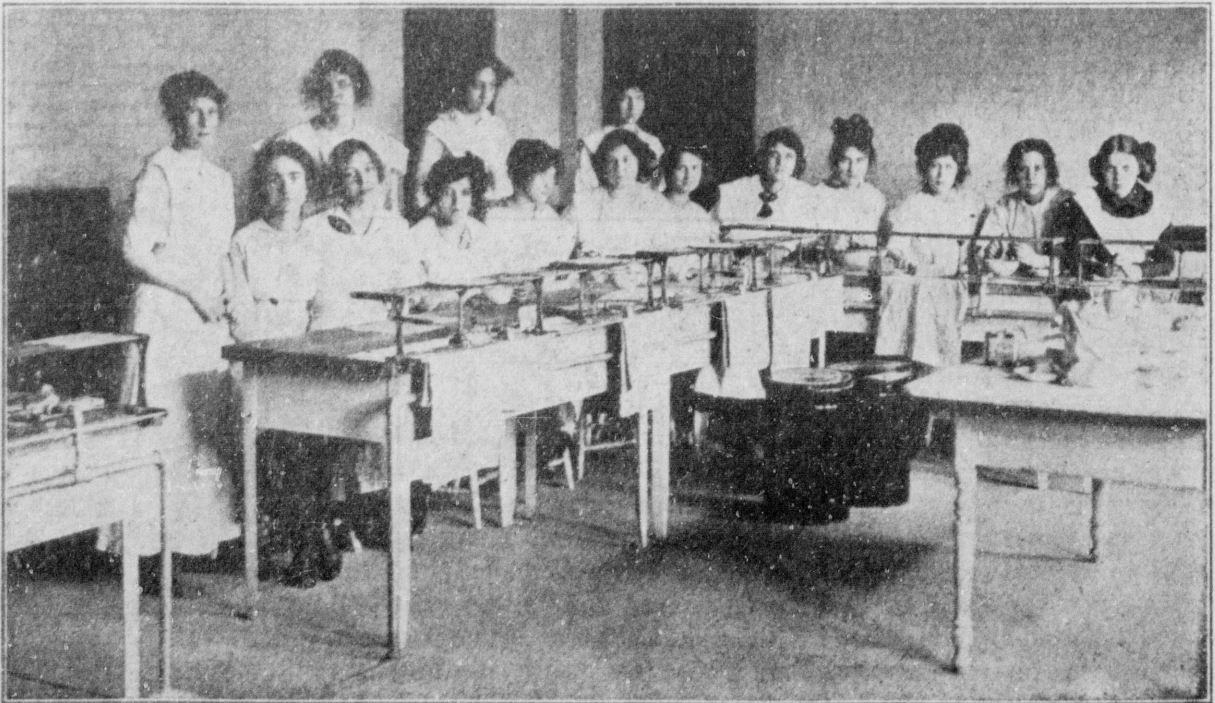

Discipline Improved.

"The usual plan of keeping the pupils of the seventh and eighth grades in the elementary school with the younger pupils complicates immeasurably the problem of discipline in these grades. The greatest problem of discipline in the elementary school is to control the big boys and girls, who are entering the age of adolescence. The effort to bring about a proper natural discipline in these older grades is reduced to a minimum when they are placed in the high school with the older pupils. The example of the upper class has a marked influence upon the conduct and character of these pupils between eleven and fourteen years of age.

"The six-year school plan shifts the break between the elementary and the high school to the natural and the least dangerous age, whether we view it from the educational, the economic

concluded, plans are being made for the coming year; and every effort is being put forth to arrange a schedule which, as far as possible, will offer to each student more opportunity for elective work. Even in the first year of the high school course, a choice between Latin and German is given, two studies, English and Algebra, are required; while the fourth is a choice from four offered electives. In the third and fourth years, only English is required throughout the year, the other three subjects being elective.

"While it is of course necessary to require a certain amount of work along lines which will be necessary for almost any advanced study, a

Sunday School
Lesson

May 31. (Second Quarter) Lesson 9.
THE GRATEFUL SAMARITAN

Golden Text: Were there none
found that returned to give glory to
God, save this stranger? Luke 17:18.

Before we consider the grateful Samaritan it will be helpful to look at the Whitsuntide lesson on the revealing spirit in 1 Cor. ii, 1-10. Whether it be the Old Testament or the New, the great truth stands that "the things of God knoweth no man, but the Spirit of God," but what a comfort it is that the believer has received the Spirit of God that he may know the things that are freely given of God. To the natural man who has not been born again these things of God are all foolishness, for only the spiritual man can discern the things of the Spirit (1 Cor. ii, 11-14). The whole Bible has been written by the Spirit of God and is forever settled in heaven (II Tim. iii, 16; Ps. cxix, 89), so that it may truly be said to be the Spirit's Bible copyrighted in heaven. He therein tells us of the living and true God, His love for the lost, His great salvation, His coming kingdom and glory. He also tells us of the devil as the great enemy of God and man, the father of lies, the murderer, the god of this world, who will to the last make war with the Lord and the saints, but who will finally be sent to the lake of fire forever.

As to the inability of the wisdom of this world to grasp things spiritual, consider the revelations of God given to the kings of Egypt and Babylon, the utter helplessness of all the wise men of those lands to grapple with them, and the ease with which Joseph and Daniel, men of God filled with the Spirit of God, solved every difficulty. The Spirit is ever ready to convince of sin and lead the sinner to Jesus Christ, the Saviour. Then by His word He gives assurance of salvation, then makes the body of the believer His temple, revealing Christ to him and through him and working in him all the good pleasure of the Lord unless hindered by pride, unbelief or self in some form of working.

No one was ever so filled with and controlled by the Holy Spirit as the Lord Jesus Christ, and in Him the Spirit wrought perfectly and unimpeded (Acts x, 38). It was so in some measure with prophets and apostles (I Pet. i, 21; Acts i, 8; ii, 4; iv, 31; v, 32; vi, 3; vii, 55; xiii, 2), and there is nothing we should so earnestly and constantly desire as to be filled with and controlled by the Holy Spirit, re-

membering that nothing can ever be accomplished for God by the might or power or wisdom of man, but only by the Spirit of God (Zech. iv, 6).

Turning to the regular lesson, we see our Lord on His way to Jerusalem, whither His face was steadfastly set, for the time was drawing near for Him to be received up, or, in other words, to be slain and be raised the third day (Luke ix, 22, 51). Although He and His messengers were sent primarily to the lost sheep of the house of Israel and not to gentiles or Samaritans (Matt. x, 5, 6; xv, 24), for the kingdom was for Israel, and He was Israel's Messiah, yet He was ever ready to bless all, and the time was drawing near when He would be rejected and crucified by the Jews, then the kingdom would be postponed and the gospel given to all the world to gather from thence in this age of "the mystery" His body, the church, to share with Him His kingdom and glory. As these ten lepers stood afar off and cried, "Jesus, Master, have mercy on us," His heart of compassion went out to them, and He sent them to the priests, which implied that their request was granted and the work was done (Luke v, 14; Matt. viii, 4). They evidently so understood it and started on their way, and as they went they were cleansed. One of the ten was so full of joy and gratitude that he at once turned back to thank his healer, and glorifying God with a loud voice fell on his face at Jesus' feet and gave Him thanks. He was a Samaritan which seems to imply that the rest were Jews. How pathetic seems our Lord's question, "Were there not ten cleansed, but where are the nine?" None to give glory to God save this stranger. Is it so still that He finds gratitude only in one out of ten? How is it with you?

Leprosy was one of the emblems of Israel's national condition before God as when Moses' hand was made leprous and then healed (Ex. iv, 6, 7). God would teach Moses and Pharaoh that though Israel was in the sight of Egypt as unclean as a nation of lepers, He could easily cleanse and deliver them. The serpent sign was to teach Moses not to fear to approach the king of Egypt, and the water of the Nile turned to blood that God would humble the pride of Egypt.

How happy this grateful leper must have been to hear the Lord Jesus say to him, "Arise; go thy way; thy faith hath made thee whole." We think of His word to the penitent woman in the house of Simon, the Pharisee, "Thy sins are forgiven: * * * Thy faith hath saved thee; go in peace." Also to the woman who had been twelve years sick and growing worse, "Daughter, be of good comfort; thy faith hath made thee whole; go in peace" (Luke vii, 48, 50; viii, 48).

McCLURE'S CLOTHING STORE
AT NORTH VERNON DAMAGED

Flames Caused by a Defective Wire Result in \$10,000 Loss—Owner is Well Known Here.

Regarding the fire which caused \$10,000 damage at the clothing store of E. C. McClure, of North Vernon, who is well known here, the Sun says: The clothing store of E. G. McClure & Company was damaged to the amount of \$10,000 last Thursday night when a fire caused from defective electric wires played havoc with a great deal of the stock and fixtures. The flames were discovered about 10:30 o'clock when they shot out from the windows in the rear of the store building. For a time the entire business section of Fifth street was thought to be in danger. Because of the intense heat from the front of the building the firemen were obliged to fight the flames from the rear. The dental parlors of Dr. Cooper when entered the next morning were found to have been only slightly damaged by smoke. The local fire company got in some mighty good work an dit was due to their timely efforts that the building was saved from destruction.

The entire stock located in the rear of the store was burned to a crisp. Elsewhere the stock was slightly damaged by smoke. The great heat caused more or less damage to the fixtures and resulted in the breaking of several plate glass in the clothes cabinets and at the front door.

The firm known far and near for its excellent business qualifications carried insurance to the amount of \$14,000 in several companies. Tuesday a representative was here and adjusted the fire loss.

VATERLAND IS BUILDERS!
MOST PRETENTIOUS EFFORT

Interesting Facts About the Greatest Ocean Liner Ever Constructed.

The \$10,000,000 steamship Vaterland, which arrived at New York on her first trip, the largest vessel ever built, has accommodation for about 4,000 passengers of all classes and carries a crew of 1,134 officers and men. There are 100 cooks and bakers, 400 stewards, and 500 engineers and stokers.

Conspicuous among the innovations of the Vaterland's construction is the arrangement of her funnels. The funnels, each part into two branches just above the hold, and these branches are carried through the decks near the hull and brought together above, each part verging at the top into one funnel. This makes room for spacious passages in the middle of the ship.

Here is a comparison between the Vaterland and other great liners:

	Length in feet.	Tonnage.	Horse-power.
Vaterland	350	54,500	32,000
Imperator	300	50,000	62,000
Aquitania	301	47,000	60,000
Olympic	282	45,000	45,000
Mauretania	270	32,500	72,000

The Vaterland is propelled by four great screws driven by turbine engines. Each of these propellers measures nineteen feet seven inches in diameter and weighs fifteen tons. When going at full speed the propellers make more than 150 revolutions a minute. The engine plant driving these propellers consists of four main turbines hatched in series.

There are three separate sending instruments in the Vaterland's wireless equipment, which is the most powerful ever installed on a ship. It will keep the vessel in touch with land continuously throughout the crossing. A second system will cover 1,200 miles at night and 400 miles in the day. A third emergency outfit, operated by storage batteries, is kept in reserve. There are three operators to share the duties in the wireless room. On the next voyage, it is asserted, passengers will be able to telephone to Hamburg from a distance of 100 miles at sea.

REPORTS RECOVERY
FROM TUBERCULOSIS

MARION S. OVERMAN.
"I am desirous of letting the public know how I recovered from tuberculosis by the use of Nature's Creation," writes Marion S. Overman, 3609 E. 16th street, Indianapolis, Ind. Mr. Overman took a heavy cold in spring, 1911, which settled on his lungs.
"My system became very much run-down and in October I was compelled to quit work," he continues. "I coughed considerably, had pains in lungs and through shoulders, bad night sweats, and had chills and fever. My doctor had my sputum examined and germs were found. I went to Texas, but, receiving no benefit, decided to return north."
"Upon arriving in Indianapolis, my friends induced me to try Nature's Creation. I was soon convinced of its merits. I began taking Nature's Creation November 20, 1911, and soon noticed considerable improvement; night sweats disappeared, cough left, strength returned, and I gained six pounds in weight. Am in better health than I have been in many months."

In January, 1914, Mr. Overman stated he was feeling fine, weighed 153 pounds, was married and the father of a 9-months-old baby.
Do you now believe in Nature's Creation? Are you thoroughly convinced of its merits? If not, remember, we have hundreds of original testimonials on file in our office, telling of the remarkable results accomplished by this remarkable remedy in the treatment of tuberculosis, and the conditions which lead to it, such as bronchitis, impure blood, run-down system and asthma. You are at liberty to come to our office and read the original letters, or you can read the testimonials in our new booklet, "Truth." It also contains photos from local parties. Address send for a copy to-day-free. Address M. L. Haymann, 417 State Life Building, Indianapolis, Ind.

INDIANA PEOPLE FIND QUICK
RELIEF FROM STOMACH TROUBLE

First Dose of Mayr's Wonderful Remedy Gives Most Surprising Results.

Hundreds of Indiana people have found relief from stomach and digestive troubles by the use of Mayr's Wonderful Stomach Remedy.

This remedy is safe and efficient. The first dose gives results. And the treatment is not long. It has a wonderful record.

Here are the statements of two who have used and proven the merit of the remedy:

CHARLES INMAN, 424 East Chestnut Street, Hartford, City, Ind.—"Four doctors said they could not cure me unless I went to Fort Wayne to be operated on. I took your treatment. In three weeks I went to work and haven't missed but a half day since."

WALTER SPRAY, 1011 South Second Street, Frankfort, Ind.—"Before I took your medicine I suffered a great deal, but since I took the first dose I have not had a bad

spell. I feel it is even more than you claim."

Letters like this come from all over the country. Mayr's Wonderful Stomach Remedy produces results. The first dose proves it.

Mayr's Wonderful Stomach Remedy clears the digestive tract of mucoid accretions and removes poisonous matter. It brings swift relief to sufferers from ailments of the stomach, liver and bowels. Many declare it has saved them from dangerous operations and many are sure it has saved their lives.

Because of the remarkable success of this remedy there are many imitators, so be cautious. Be sure it's MAYR'S. Go to C. E. Loertz' drug store and ask about the wonderful results it has been accomplishing—or send to Geo. H. Mayr, Mfg. Chemist, 154-156 Whiting St., Chicago, Ill., for free book on stomach ailments and many grateful letters from people who have been restored. Any druggist can tell you the first dose I have not had a bad

FOR PROSECUTING ATTORNEY.

We are authorized to announce the name of Marshall Woolery, of Bedford, as candidate for Prosecuting Attorney of the Fortieth Judicial Circuit, subject to the decision of the Republican judicial nominating convention.

A SUCCESSFUL YEAR.

The work of the Seymour public schools for this year has been completed and the classes have adjourned for the summer vacation. A review of the past nine months shows that the year has been marked by many improvements and as a whole has been remarkably successful. It must, indeed, be with pleasure that the school officials and corps of teachers look back upon the past year and recall the many forward steps that have been taken. They are to be congratulated upon their success for the efficiency of the public schools rests very largely with the teaching force. The work will be advanced or retarded according to their interest and enthusiasm. The very satisfactory results indicate that all connected with the city educational system feel the responsibility resting upon them.

During the past year the public has shown a new interest in the school work and has manifested a desire to cooperate with the officials for the general improvement of the system. The public school is recognized as

one of the three requisites of our advancing civilization. It is in the classroom that the pupils are given not only educational training but such instruction that will make them better men and women. If a school is conducted in accordance with the modern educational idea, the teachers will give particular attention to character building as it is recognized now that no man or woman can be a success in life unless they have high ideals and are ready to labor for the welfare of the community.

In the Seymour public schools an effort is made to provide such a course that the minds of the pupils will be broadened, so that they will be fully equipped to successfully cope with the problems of life. If they prefer to specialize along one particular line they are given an opportunity to do so. Yet at the same time other subjects which will be of more value to them than they realize are made a part of the compulsory course. There are few schools in Indiana that offer better advantages than those found in Seymour where the system is conducted by qualified educators and teachers especially equipped and fitted for the positions they hold.

The success of the year should be an incentive to bigger and better things in the future. The improvements must come slowly and can only be made as the needs demand.

There is every reason to believe, however, that the next year will be more successful than this and that the present advancement will be continued until the local school has few equals in the middle west.

THE MEXICAN SITUATION.

By the Washington news dispatches the public is informed that the Mexican situation is slowly improving and that the administration officials are much encouraged over the work that has been done by the mediators. Today we are told that not a single question has arisen but that can be adjusted satisfactorily to the representatives. However, nothing is said as to when a final agreement may be reached.

The mediators have proposed that a provisional government be organized for Mexico and it is agreed that such a plan would be successful, at least temporarily. But the principal obstacle encountered in this plan is the elimination of Huerta. In fact, the United States has demanded that Huerta be retired and cannot descend from this position with any degree of dignity.

The conference is continued with the hope that the dictator will soon be forced from his official capacity and it appears, the plans are being built upon this possibility. In the meantime, Carranza, the leader of the Constitutionalists, is asking that his representatives be recognized at the peace mission. Heretofore he has refused to take part in the conference as he would have been required to stop hostilities as long as the mission was in session. With the Constitutionalists' leader gaining victory after victory in his campaign against his political enemy it would have been surprising if he would have consented to the plan. Now that he is con-

R. G. HAAS,
 Dentist.

Office 6, South Chestnut Street.

Above Public Service Co.

stantly gaining ground it is naturally presumed that he would desire to send representatives which in a measure would be recognition of his power.

So far as the United States is concerned, there is but one avenue open. That is, the elimination of Huerta and if he does not retire of his own accord or is forced out by his enemies the United States must retire him. Of course, it is to be hoped that it will not be necessary for this country to invade Mexico and that the encouragement offered by the administration officials is grounded upon solid facts.

The members of the Grand Army of the Republic are unable to understand President Wilson's action in refusing to speak to the Union soldiers on Decoration Day and accepting an invitation to address the Confederate veterans. A protest has gone up in all of the northern states against his attitude and he will likely hear from it in a positive manner shortly.

PATTERSON PLEADS GUILTY; GIVEN SUSPENDED SENTENCE

Promises Court to Pay Back Money Which He is Alleged to Have Taken from Adams Express Co.

Oliver E. Patterson, who was held at the county jail for several weeks pending his trial in the circuit court on a charge of embezzlement, has pleaded guilty and given a suspended sentence. He is alleged to have taken \$185 belonging to the Adams Express Company when he represented that company in this city. Patterson told the court that he desired to pay the money back and start life anew. The prosecution recommended that the sentence be suspended. He was arrested at his home in Ohio several weeks after he was discharged and has been held at the county jail since that time. His brother came to his assistance and asked the leniency of the court.

Notice.

All who will contribute flowers to be used in the G. A. R. and W. R. C. decoration Saturday, are requested to bring them to the home on L. W. Jones on North Ewing street Saturday morning before nine o'clock.

Notice!

NATTY COSTUMES SHOW NET EFFECTS

Styles Show Reversion to Mid-Victorian Days when Skirts were Pyramid of Ruffles.

DAINTY TINTS IN FILMY GOODS

New Fashions Give Appearance of Butterfly Entrapped in a Mesh of Network.

By United Press.

New York, May 29.—To be natty this summer you must be netty. This is the net result of the present demand of the mode for ruffles and flounces. They must be constructed of soft, filmy fabrics to escape being bulky. Consequently along with organdie and Paris muslin, the all-over-net dress holds the centre of the summer sartorial stage.

One of the prettiest models in the net is a reversion to mid-Victorian days with the skirt simply a charming series of six ruffles from the round baby waist down to the ankles. The waist is a loose blouse with set-in sleeves ending in a froth of three ruffles at the elbow. The open throat is finished with a narrow ruffle which meets at the bust line and continues in double file down to the waistcoat girdle of soft rose taffeta. All the ruffles are edged in rose embroidered scallops and the whole creation converts its wearer into a veritable butterfly in the net.

Another effective frock of simple lines has a new long tunic of pleated net over an underskirt of net which is also pleated and caught just above the knees with a crush sash of soft satin tied with a four looped bow in front. The crush girdle is of the same soft satin and the waist is also pleated and untrimmed with a V-shaped low neck and tiny short sleeves that end abruptly, midway of the shoulder and elbow with a wee frill of the net. This is neat, but not gaudy.

Those net frocks are really prettiest in white, but in soft shades of maize, blue, pink, lavender and sea-green they are very desirable. The flowered net with tiny nose-gays or pink rose buds scattered over a white, blue, flesh or maize ground is very quaint and lovely made up in shepherdess style. The combination of a panner skirt of flowered net opening up the front over a flowered petticoat of cream lace, the peasant bodice of the net over a guimpe of the lace with ruffled elbow sleeves, is piquant.

Flesh colored hose with velvet pumps, a narrow black velvet ribbon tied around either bare wrist and a rose trimmed leghorn hat of shepherdess shape held under the chin with a black velvet ribbon completes an enchanting ensemble.

Leghorn hats by the way are in high favor this summer either in floppy garden hat shapes or the chic tilted bandeau models. All are, of course flower trimmed that do not run to fruit. Wheat combined with flowers is considered very smart.

Now that the milliners are bringing in the sheaves as hat decorations it probably will not go against the grain to adapt the best brands of breakfast foods for chapeau garnishment in the near future.

THOUSANDS ON WAY TO THE SPEEDWAY
(Continued from first page)

ial Day exercises at the Majestic the veterans and Relief Corps will march to the Riverview cemetery where services will be conducted at the graves of Jacob Klein and Mrs. Sarah Patrick. All the graves of the deceased veterans will be decorated with flowers and will be marked by an American flag. Arrangements have been made so that the Relief Corps and the feeble veterans may ride to the cemetery.

All Sunday School children are requested to join in the line of march to the cemetery. The announcement is made that the Seymour Company of Indiana National Guards will par-

ticipate. Practically all the stores in the city will be closed after the noon hour. The banks will not open their doors Saturday morning and the postoffice will observe holiday hours. A number of picnic parties have been planned for the afternoon but whether or not these take place depend upon the weather. As a general rule Decoration Day is announced with a rain or storm which interferes with the plans for outdoor recreation. The weather prophet is not very popular today as he predicts cloudy weather for tonight and Saturday and indicates that thunder storms may be expected. However, he gives the comforting forecast that the showers will be followed by a lower temperature.

FARMERS DECLARE CROPS ARE IN NEED OF MOISTURE

Serious Damage has not Yet Resulted in this County—Strawberry Plants Need Rain.

Although the farmers declare that the wheat and other growing crops are in need of rain it is not believed that any serious damage has resulted and that the harvest will not be affected if a good shower falls during the next few days. In some sections of southern Indiana the drought is serious and the corn ground has been plowed over again.

This vicinity received rain later than did other communities and none of the crops are dying for want of moisture. Farmers at this particular time are anxious for a good down-pour as they say that it would be beneficial to the wheat fields which have been damaged to some extent by the Hessian fly. It is reported by experts that the fly damage would be very small, except in a few localities if rain were followed by several days of cool weather. The strawberry crop is reduced on account of the drought and growers predict that the local market will reach its height the first of next week. A good rain would be worth hundreds of dollars to the growers in this vicinity.

PERSONAL.

C. S. Mercer went to Indianapolis this morning on business.

John H. Kamman went to Browns-town this morning to attend court.

Harry Hayes, of Medora, was in the city this morning on business.

Mrs. M. R. Langley went to Aurora to spend the Decoration day with relatives.

Dr. F. A. Steele left this morning for a trip to Nashville, Morgantown and Edinburg.

Dale Patrick went to Indianapolis this afternoon to attend the auto races Saturday.

August Kroeger will go to Louisville Saturday to visit over Sunday with his parents.

Mrs. Lee Dobbins returned this morning from a week's visit with relatives in Loogootee.

Miss Madeline Riehl went to North Vernon this morning to visit her grandmother for a few days.

Paul Hodges, of Bedford, came this morning to visit over Sunday with his mother, Mrs. Joseph Reath.

Mr. and Mrs. Herbert Durham went to Indianapolis this afternoon to visit relatives over Sunday.

Miss Bernette Birch came from Louisville today and Saturday will go to Indianapolis to attend the auto races.

Mrs. Kate Gasaway of Uniontown, was here this morning on her way to Brownstown to spend Decoration Day.

Miss Marion Kattman, of Browns-town, was here this morning on her way home from a visit in Crothersville.

Charles Hess, Cliff Starr, Harold Stewart will motor to Indianapolis Saturday morning to attend the races.

Mrs. Carl Droege arrived Thursday evening from Milwaukee, Wis., to visit her parents, Mr. and Mrs. H. F. Heideman.

Mr. and Mrs. Ralph Gardiner and children, of Sellersburg, came this morning to visit until after Decoration Day.

Mr. and Mrs. Carroll Bush went to Indianapolis this morning to visit friends and attend the Speedway auto races.

Mr. and Mrs. Mitt Hazzard and O. S. Brook were here from Brownstown Thursday evening to attend the commencement.

Mr. and Mrs. Fred Fuller came from Shelbyville this morning to spend a few days with relatives and friends here.

J. H. Andrews, John Peters and Everett Meyers will motor to Indianapolis Saturday morning to attend the auto races.

Mrs. N. G. Smith returned home Thursday evening from an extended visit with her mother, Mrs. Smiley, in Greencastle.

Mrs. Ellsworth Johnson, of Wegan, Ky., came to attend the commencement and to visit her sister, Mrs. Lawrence Byrne.

Mrs. Zelma Leas will go to Greencastle this evening to visit relatives for the week-end and to attend the Decoration exercises.

Miss M. Robertson, bookkeeper at the Telephone Exchange, went to Indianapolis this afternoon to visit over Sunday with friends.

Mrs. John W. Leyhan of Washington, came Thursday to visit with Mr. and Mrs. Charles Kaufman and to attend the commencement.

Miss Leota Birch, of Cincinnati, came this morning and will join a party of friends here to attend the auto races at Indianapolis.

Mrs. Howard Brown came Thursday from Cincinnati to visit her parents, Mr. and Mrs. Ed Doane and to attend the commencement.

Mr. and Mrs. George Fox and daughter will arrive Saturday morning from Greensburg, Pa., to visit his parents, Mr. and Mrs. Mike Fox.

SHOWS FARMERS MOVE TOO OFTEN

Census Indicates the Cause of
Many Failures.

1,000,000 LEFT WITHIN YEAR

Results Shown in Crop Tabulations,
Which Prove Smaller Yield in Sec-
tions Where Frequency of Removal
From the Land is Greatest—Con-
ditions Vary in Different Sections.

Do farmers in the United States move from farm to farm, from home to home, as much as city people? If they move every few years are they as efficient farmers and can they know their farms as they should? Would constant change mean low yields of crops and little interest in the community? These are some of the questions affecting rural communities that are coming to the foreground, and for the first time a partial answer can be given with authority.

During the agricultural census of 1910 this question was submitted to each farmer for answer: "How long have you lived on this farm?" Of the 6,361,502 farm operators in the United States April 15, 1910, 5,794,708, or 91 per cent, answered the question satisfactorily. From the data obtained from the answers to this inquiry a bulletin will be issued soon by the bureau of the census, department of commerce.

The statistics will show the length of the periods of occupancy of farms in the United States by states, geographic divisions and sections, for different periods of time ranging from less than one year to ten years and over, and these data are further classified according to the character of the tenure and of the color of the farm operators. The statistics are given for 1910 only, as no corresponding data have been collected heretofore.

Cause of Frequent Failure.

One of the most important facts is that approximately 52 per cent of the farmers who answered the question satisfactorily had occupied their farms less than five years. This short period of occupancy for over half of all the farmers in this country becomes all the more significant when it is taken into consideration that it requires three or four years for a farmer to become acquainted with the various conditions on his farm, such as soil, climate, etc., and put it in good condition for raising crops.

Different conditions are found in different sections. In the north 57 per cent, or nearly three-fifths, of the farmers had operated their farms for five years or longer, while only 22 per cent had been there one year or less. In the west the proportions were 44 and 27 per cent respectively, while in the south only 41 per cent had been on the same farm five years or longer and 34 per cent, or over one-third, had been there one year or less. A great number of farmers had operated their farms "less than one year" than from "five to nine years, inclusive." More than 1,000,000 farmers reported that they had operated their farms "less than one year," about 628,000 reported residence of "one year," an average of about 457,000 reported a residence of "two years," "three years" and "four years," and an average of less than 200,000 reported residence for periods of "five to nine years."

The figures returned by the "occupancy of farms" census also show that the farmers classified as "owners, free," more from farm to farm much less frequently than the "share tenants"—farmers who rent farms on shares.

Effect on Crop Production.

The showing of greater stability of occupancy by the farmers in the north as compared with the farmers in the south and the west is more significant when comparisons are made of the production of farm crops. Corn is grown extensively both in the north and in the south and probably is the best crop to use as a basis of comparison. According to the figures from the reports of the census, the average yield of corn per acre in 1909 in the New England states was forty-five bushels; in the middle Atlantic states, thirty-two bushels; in the east north central states, thirty-nine bushels, and in the west north central states, twenty-eight bushels, while in the south Atlantic states, where the farmers shifted from farm to farm more than in the north and west, the average yield of corn per acre was sixteen bushels; in the east south central states, nineteen bushels, and in the west south central, sixteen bushels.

These figures seem to show that in those sections where farmers generally have operated the same farms for periods of five years and over the yield of corn is considerably larger than in the sections where the period of occupancy is more unstable or for shorter periods of time.

Police Dogs Learning English.

A training school for police dogs at Hamaroneck, N. Y., occupies a seven-acre farm. At the present time seventeen German shepherd dogs are learning all that they should know prior to making their American debut in exhibitions. The first thing that these dogs have to be taught is English, as most of them understand nothing but German.

INTENSIVE FARMING.

When the manufacturer uses the newspaper for his advertising campaign he is applying the principle of the intensive farmer. When he advertises in the newspapers of any city, he is thereby picking out a particular spot and cultivating it for all there is in it.

He is not wasting time nor money nor energy. He is not spreading his advertising over territory where he may have little or no distribution.

His campaign is concentrated where it may be studied and where results can be definitely computed.

Perhaps more important than all, he is gaining the support and the co-operation of the local dealers in the community where he advertises, and who appreciate that the missionary work done in their own town is bound to send customers to their stores.

The Bureau of Advertising, American Newspaper Publishers Association, World Building, New York, solicits correspondence with manufacturers interested in newspaper advertising.

Booklet on request.

The Diving Bell.

The celebrated philosopher Aristotle speaks of a diving bell which was put over the head of the diver, but there is no proof of the use of the bell in ancient times. John Jaesner, who lived in the early part of the sixteenth century, makes the earliest mention of the practical use of the diving bell in Europe. In all probability the first real practical use of the diving bell was in the attempt at rescuing the treasures of the Spanish armada off the English coast, 1590 and on.

Coughed for Three Years.

"I am a lover of your goodness to humanity and science. Your medicine, Dr. King's New Discovery, cured my cough of three years standing," says Jennie Flemming, of New Dover, Ohio. Have you an annoying cough? Is it stubborn and won't yield to treatment? Get a 50c bottle of Dr. King's New Discovery today. What it did for Jennie Flemming it will do for you, no matter how stubborn or chronic a cough may be. It stops a cough and stops throat and lung trouble. Relief on money back. 50c and \$1.00. Recommended by H. H. Carter Drug Co. Advertisement.

Flooring Papa.

Five-year-old Tommy was being put through a test in numbers before the admiring family one day at dinner. Finally papa asked him the question that had proved the Waterloo of the other children in past years.

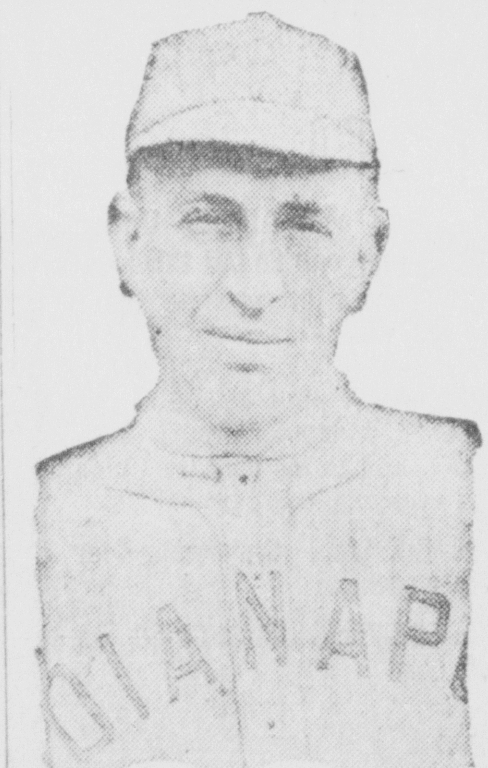

"Now, Tommy," said papa, "how many are two apples and three pears?" "Five fruits!" promptly answered Tommy.

Keep Bowel Movement Regular.

Dr. King's New Life Pills keep stomach, liver and kidneys in healthy condition. Rid the body of poisons and waste. Improve your complexion by flushing the liver and kidneys. "I got more relief from one box of Dr. King's New Life Pills than any medicine I ever tried," says C. E. Hatfield, of Chicago, Ill. 25c. Recommended by Carter Drug Co. Advertisement.

CARL VANDERGRIFT

Crack Infield Utility Man
With the Hoosier Feds.

Carl Vandergrift, former second baseman for the Port Wayne team of the Central League, who was a member of the pennant winning Indianapolis club of the Federal League last year, was retained by Manager "Whoo Bill" Phillips of the Hoosiers this year because of his wonderful ability to play inside ball. Vandergrift recently joined the Phillips squad, having come from South Carolina, where he was coaching a college baseball team.

HORROR TALES OF RIVAL THOSE OF

Survivors Describe Awful Fate
of Men Who Died Insane
From Thirst.

A THRILLING story of hardship in an open boat in midocean, a tale of heroic toilers of the sea facing the torments of hunger, thirst, bitter cold and dire peril of winds and waves was brought to Halifax, N. S., by Captain E. J. Johnston of the American revenue cutter Seneca, which rescued the four remaining surviving members of the crew of the Leyland liner Columbian, burned at sea on May 5.

The fifteen men in the lifeboat subsisted on ship's biscuits, shoe laces and leather and salt water.

They saw three liners pass, but their efforts to hail the ships were futile.

Chief Officer Robert Tiers, who is only twenty-two years old, gave the following account of the castaways' adventures:

"When we abandoned the Columbian we had a cask of water and the boat's bread tank was three-quarters full. I put the boat's crew on rations, one biscuit and half a cupful of water three times a day for each man. When it rained we caught water in the sail, and in that way kept up our supply until we were rescued. The biscuits rapidly ran low, and at the end of the first week the allowance was cut down by one-third.

Drinking Sea Water Fatal.

"On Saturday, May 9, Oiler George Hull complained that he could not stand short rations of water, and despite all the advice of the boat's company began drinking sea water. That night he became delirious. We tried to revive him with a little water, but it was too late, and after making sure that he was beyond all help we put his body over the side, and I said what I could remember of the burial service over him.

"Then Richmer, a fireman, died about 2 o'clock in the morning. Anderson, another fireman, died the next day, and so did the cook, Schrimberger. Gustafsen was the next to die.

"All these men went pretty much the same way. They began to drink sea water, and their sufferings were frightful. The more they drank the more they wanted. There was one tin dipper in the boat, and I tried to keep this in my possession. But if I was asleep they would get it away from me. It was pretty much one continuous nightmare about this time. I would get the dipper away from men who were swilling salt water, but the next minute they would be leaning out over the gunwale of the boat, lapping it up like cows at a brook. Soon they would go crazy. All of them died singing, completely insane. I think it was the salt water more than anything else that killed them. The men who kept to the scanty portion of fresh water stood the exposure better.

Fight With Giant Madman.

"Margetts, the chief engineer, was the next to die. He perished from exposure. Then one of the worst of all our trials happened. Jakob, a big oiler, a Russian, who stood over six feet, started to drink salt water, went insane and tried to kill the whole boat crew. There were only five of us alive then, and poor Dyckman, the mess boy, was so weak he could not stand.

"I was sleeping when Ballanger woke me up and said that Jakob had gone crazy. He was sitting in the boat with an ax and swearing he would go ashore for a drink. I talked to him a bit, coaxed the ax away from him and got him to lie down. I took everything I thought he could use for a weapon away from him, but I had hardly fallen asleep when he got a boat stretcher and came aft, threatening to kill us all. There was nothing for it but to tie him up.

"Jakob was ordinarily a very powerful man, about forty years of age, and Kendal, Ballanger, Ludwigen and myself had all we could do to handle him. He was screaming at the top of his voice that we were trying to keep his money from him so he could not go on a spree. He shouted out that I had his passbook and would not give him his pay and he was going to lay for me particularly.

"We had a pretty hard fight to get him under control. But we finally tied him down in the bottom of the boat and lashed him to a thwart. He lived for five or six hours, screaming at the top of his voice. Then he became exhausted. We forced a little water between his lips, but it was no use. He had gone.

Dreamed of Rescue.

"Prievie, the mess boy, was the last to go. Before he went he told us that he had dreamed he would be on a buzzing ship at sea and that he would be for fourteen days in an open boat without food, but would be rescued on the fourteenth day. He fought hard to live until that time, but he was too weak.

"From that moment we sat in the most despairing and hopeless lethargy. Even the sight of the Seneca did little to revive us. We had so often vainly shouted for help from passing boats that we could not believe rescue was near. I never thought I would live to

SEA CASTAWAYS FICTION'S FANCY

Those Left on Drifting Boat
Ate Boots of Sailors
Who Perished.

see today. In fact, I wanted to die, as did we all. It seemed a terrible dream.

"When there were only five biscuits and less than a pint of water left for the four survivors we cut up the boots of dead men and tried to mix a sort of paste with the leather and the crumbs, but it was not palatable."

Unselfish Sufferers.

Tiers' story was supplemented by Peter Ballanger, the only other member of the quartet who spoke English.

"It was bad enough when we had only one pint of water a day," he said, "but the last four or five days, when once a day Mr. Tiers would dip up half a pint of water in the tin cup and say three would have to share this, it was pretty tough to just take one little sip and leave enough for the next two men. But I'll say that for them, no man tried to take more than his share. When Jakob, the Russian oiler, went crazy Mr. Tiers gave him some of his own share of the water. Poor fellow! He was a good man, but he took to drinking the salt water, and then his head went like the others.

"I was the only one awake when Jakob went crazy. Mr. Tiers, Ludwigen, Kendal and Prievie, the Belgian cabin boy, were all sleeping. The first thing I knew Jakob began to cry out for rum. Then he said he wanted to go ashore and get drunk, but that Tiers had stolen his money. He got the ax, and then I woke Mr. Tiers, and I went forward and talked Jakob around a bit, coaxed the ax away from him and covered him over with his own overcoat. Jakob lay down a bit. Then he got up again, picked a stretcher up off the cleats on the bottom and came for Mr. Tiers.

"Prievie was so weak he could not help us, so we four had to handle Jakob, and he gave us an awful fight. He was a great big fellow, bigger than any of us, and rage made him stronger. I don't know how long it took us to down him. He might have beaten us all and killed us with an ax, but Ludwigen managed to hit him on the jaw with an oar. While he was unconscious we tied him up to the forward thwart. We gave him all the water we could spare, but he was too far gone. He kept shrieking for rum at the top of his voice and threatening to kill every one of us.

Rowed For Their Lives.

"I was awful weak and didn't think I could get on my feet when Kendal called out that he saw smoke. The Seneca wasn't moving when we first saw her. She was taking some soundings, and we started to row toward her. Once I got my oar going I just kept it going because I knew if ever I stopped I would keel right in. They had to carry us all up on the Seneca.

"It was pretty bad when Hull got crazy through drinking the sea water. After that it wasn't so bad, except that you couldn't tell who was going to give in next and start to drink the salt water. I guess it must have burned their insides all up, for the more they drank the more they wanted.

"I knew myself that it would kill me, so I stood the little fresh water as best I could. It was awful to see Hull leaning out over the gunwale drinking out of the ocean—clean crazy. But after he went that way it didn't seem so bad when the next man, Richmer, died. After that we seemed to get used to it.

"Little Prievie, the Belgian cabin boy, died calling for his mother. Poor boy! He was so brave he deserved to live."

ON THE WRONG SHIP.

Discipline Led Officer of the Day to
Obey Orders of a Strange Captain.

Late one night when the fleet was off Vera Cruz a certain captain stepped into his launch and started for his ship. His thoughts were on the day's work and the plans for the next, and as his boat came to a stop off a gangway he stepped out on the landing and mounted to the battleship's deck.

"Tell the boat to cast off," he said to the officer who saluted him.

The officer of the day did so. He knew it was not his captain, but discipline laid down its rules. The captain strolled across the afterdeck.

The commander—a commander is next in rank to a captain on a battleship, is on duty twenty-four hours a day and ranks with a major in the army—met him, saluted and passed on. That seemed strange to the captain.

"What ship is this?" he asked.

"The —, sir," said the commander.

"I thought it was my ship," said the captain.

"Drat that coxswain, why did he put me off at this ship?" demanded the captain from the officer of the day.

The captain descended the gangway. The ship's boat drew up to receive him. The coxswain looked up to the deck for his orders.

"Proceed to the — with a passenger and return to ship," ordered the officer of the day.

"Aye, aye, sir," replied the coxswain. That ended the incident—not the story.

ROOSEVELT'S MEETING WITH RIS, HIS BIOGRAPHER.

"How the Other Half Lives" Stirred the
Colonel to Hunt Up Author.

Surely one man could have said no more in praise of another than was spoken in 1903 by President Roosevelt of his friend, Jacob A. Riis, who later became Roosevelt's biographer. The presidential car had stopped at Richmond Hill, N. Y., home of the "friend of the president," and from the rear platform was spoken that tribute which caused the country to inquire, "What is this man like?" of the writer and reformer whose illness at Barre, Mass., attracted the nation's attention anew.

The chief executive said that when he preached of good citizenship he pointed to Jacob A. Riis as an example of what he meant. He described him as a man who acted squarely, worked hard, wore no sour visage, and not only held high ideals, but fought for them.

No better description of the man could be given. Jacob A. Riis has been a fighter, a hard worker, and again a man who carries on no "rosewater revolutions," as the president put it.

Although Jacob A. Riis has been a fighter all his life, even before he came to America from Denmark, his battles have always been for somebody else. He fought for small parks for the people and got them. He insisted that foul tenements should be torn down, and he would not be still until the old rookeries which breed disease and crime were pulled down almost over the ears of their landlords. As secretary of the small parks commission and as executive agent of the good government clubs he attacked filth and crime like a man leading a cavalry charge. His energy and his determination when, as a police reporter for a morning paper and as a writer in the magazines, he took up the battle for decency and cleanliness and for sunlight for the poor brought him the friendship of Theodore Roosevelt.

His book, "How the Other Half Lives," which contained revelations about the awful conditions prevailing in the tenements of New York, aroused the better element and set the whole country by the ears in 1890.

It was then that Theodore Roosevelt, then civil service commissioner, climbed a greasy circular staircase to a dingy newspaper office and inquired for Jacob A. Riis, whom he had never seen. Mr. Riis was out, and when he returned he found a card on the back of which was written, "Have read your book, and I have come to help."

Theodore Roosevelt did help, and he and Jacob A. Riis stood shoulder to shoulder in "The Battle With the Slums" and in "The Ten Years' War."

500,000 CIVIL WAR VETERANS

Estimated Number of Survivors Forty-
nine Years After Close of Conflict.

There are still some 400,000 survivors of the civil war who fought for the north. A conservative estimate of the Confederate survivors is 100,000. This is based on their statement that their numbers never exceeded 600,000. Since Memorial day, 1913, a number of prominent veterans on both sides have passed away, the most prominent of whom were General Daniel E. Sickles of the north and General Simon Bolivar Buckner of the south. General Sickles was one of two surviving corps commanders. General Grenville M. Dodge, the other, is still living.

As usual, this year's big Memorial day celebrations were planned in New York, Chicago, Boston, Philadelphia and at the Arlington National cemetery. On June 4 a monument to the Confederate dead is to be unveiled at Arlington cemetery.

MEXICAN WOMEN IN BATTLE.

Aided Federals in Firing Line During
Fighting at Zartuche.

The women who follow every Mexican army took a prominent part in the recent fighting at Zartuche. As the federal soldiers swarmed from the cars some of the women dragged out and broke open boxes of ammunition, carrying the cartridges to the federal soldiers in the face of the Constitutionalist fire. Others crouched on the iron roofs of the cars, took up the rifles of the wounded and loaded and fired with all the coolness and determination of veterans.

A half dozen of the women made a desperate effort to bring a machine gun on one of the flat cars to bear on the Constitutionalist troops, but they could not get it in position, as the male soldiers had surrendered.

Family Cow Scorns Improvements.

Thirteen-year-old Wilbur Anderson of Owensville, Ind., saw a horse protected by leggings and tried to put rubber boots on the family cow. The latter kicked Wilbur through a picket fence.

A Fish Story.

There was a fish
Who grew too fat.
He worried much
And grieved thereat.
To train and bait
He did not fail;
He exercised
His fins and tail.

And yet, alas,
He had to live.
A single bite
He had to give.
He ate one fly.
Though strange it sounds,
His weight at once
Increased two pounds.
—McLandburgh Wilson in New York Sun.

MRS. WILLIAMS' LONG SICKNESS

Yields To Lydia E. Pinkham's
Vegetable
Compound.

Elkhart, Ind.:—"I suffered for four-
teen years from organic inflammation,
female weakness,
pain and irregulari-
ties. The pains in
my sides were in-
creased by walking
or standing on my
feet and I had such
awful bearing down
feelings, was de-
pressed in spirits
and became thin and
pale with dull, heavy
eyes. I had six doc-
tors from whom I received only tem-
porary relief. I decided to give Lydia E.
Pinkham's Vegetable Compound a fair
trial and also the Sanative Wash. I have
now used the remedies for four months
and cannot express my thanks for what
they have done for me.

"If these lines will be of any benefit
you have my permission to publish
them."—Mrs. SADIE WILLIAMS, 455
James Street, Elkhart, Indiana.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and to-day holds the record of being the most successful remedy for female ills we know of, and thousands of voluntary testimonials on file in the Pinkham laboratory at Lynn, Mass., seem to prove this fact.

If you have the slightest doubt
that Lydia E. Pinkham's Vegeta-
ble Compound will help you, write to
Lydia E. Pinkham Medicine Co.
(confidential) Lynn, Mass., for ad-
vice. Your letter will be opened,
read and answered by a woman,
and held in strict confidence.

THANKS TO HIS PRESERVER

"Luckily for Me I Wasn't Bald-Head-
ed," Exclaimed Man Rescued
From Swimming Tank.

A well-known athlete says that on
entering a Turkish bath one night he
found a stranger struggling in the
swimming pool. There was nobody
near, and the man was evidently un-
able to swim, having jumped in prob-
ably without ascertaining whether
the water would be above his head.

The athlete swam to the assistance
of the struggling man. Grasping him
by the hair, he towed him to the side
of the tank and assisted him to hang
on until he recovered his breath.

What were the first words uttered
by the rescued one? Did he stammer
out thanks to his human preserver?
No. The human mind is a curious
affair. As the half-drowned man
struggled back to consciousness, mem-
ories of an old jest seemed to flit
through his brain, for he said:
"Luckily for me I wasn't bald-head-
ed!"—New York Mail.

No Comparison.

An Englishman and an American
were standing before the wonders of
the Victoria Falls, in darkest Africa,
when the Englishman said:

"Surely you must concede that
these falls are far grander than your
Niagara Falls."

"What!" replied the American.
"Compare these to our Niagara Falls?
Why, man alive, they are a mere
perspiration."—Ladies' Home Journal.

A Policeman's Business.

Nervous Lady (in whose street there
have been several burglaries)—How
often do you policemen come down
this road? I am constantly about but
I never see you.

Policeman—Ah, very likely I see
you when you don't see me, mum.
It's a policeman's business to secrete
himself!—London Punch.

Bird Lore.

"I'm going to quit talking about the
dove of peace," said the patriotic
orator.

"Going to recite about the eagle for
awhile?"

"No, I want to emphasize the com-
fort and prosperity that accompany
peace. I'm going to raise the emblem
of the goose that lays the golden egg."

Policy.

"You're not going to publish that
awful rubbish, are you?"

"Do you mean this poem on spring?"

"I mean that atrocious libel on the
English language."

"I guess I've got to publish it."

"Eh! Why?"

"Well, you see, it's written by my
tailor's daughter."

H. S. DIPLOMAS PRESENTED TO FORTY-FOUR SENIORS
(Continued from Page 4)

in their study of literature and other subjects. It is an inspiration, he said, for a man or woman to look back upon their school course and remember the teaching of the great masters which they studied.

Dr. Kelley declared that in ten years the members of the graduating class will probably be unable to pass satisfactory examinations in the very subjects which they studied in their high school course, but that did not signify that the schools were not efficient. It only meant that they had not followed the work which they had started. He said enthusiasm in the task to be undertaken was one of the requisites to success.

In closing Dr. Kelley asserted that the schools of Indiana had reached a high rating of efficiency and stood for these five points as well as for many others. Linking all of these essential elements is a strong, christian character. This is necessary if success is attained, the speaker declared.

Dr. Kelley said that a man of his acquaintance had made a fight for a great reform and his enemies had endeavored to ruin his career by besmirching his character. Through it all, however, he had stood the test and had come out from under all the attacks with two clean hands and an honest heart. This is the greatest equipment that can be given by the schools. The speaker closed by telling the class that if they appreciated the opportunities given them it was now their chance to make the most of it.

Following the address the Girls' Glee Club gave two delightful numbers, "The Swing Song" and "The Snow."

Miss Kate Andrews, principal of the high school, in presenting the class to the superintendent and board of trustees, said she had watched the class closely both as principal and teacher, and that the class was not only the largest in the history of the local schools but was one of the strongest. The mental and spiritual points had been shown during the high school course. Miss Andrews said the class had been loyal and full of encouragement and enthusiasm. For four years she had watched them battle against temptations which will not appear to be great in later life but which seemed to be great obstacles at the time. She said she had had the pleasure of watching the class make the fight against the temptations in a manly and womanly way and had seen the resulting victories. Temptation is for man to meet and master, she declared, and in her message to the class told them to have the courage of their convictions to strive for the truth and their reward will be victory.

Superintendent Mott presented the diplomas declaring that it was pleasure for him to serve in that capacity for the first time. The class, he said, had done a good work and were not commencing in a new field of work. He said the graduates had made a good record in their school work and had the capacity to become star performers.

He said that the Seniors could not have done the twelve years of work in the public schools without the assistance of the home, neighbors and the church.

After the members of the class received their diplomas they were congratulated by many of their relatives and friends.

SPLENDID ATHLETIC FIELD WILL BE AVAILABLE IN FALL

High School Has Secured Permission to Use Woodstock Grounds—Ball Diamonds Arranged.

High school students have manifested much interest in the new Woodstock athletic park arrangements for which were made this spring. For some time there has been a demand for an athletic field but only temporary arrangements could be made.

This spring the owners of the ground consented to permit the high school to use part of the tract and a well arranged park can be provided. Already base ball diamonds have been made, a basket ball court arranged and a track built. While a limited amount of money was available for this purpose the grounds have been placed in good condition and further improvements will be made from year to year in the future.

It is expected that the athletic director next year will hold basket ball practice on the open field and will give more attention to field events. With the new ball grounds games with other high schools in southern Indiana can be scheduled and quite a large crowd of spectators can be accommodated.

Attention Eagles.

Memorial service at the Aerie Sunday afternoon, May 31, at 2 o'clock for members only.

Joe Steele, Sec'y.

The Board of School Trustees

Dr. W. M. Casey.

Leroy Miller.

Benjamin F. Schneck.

SUCCESS OF CITY SCHOOLS DUE LARGELY TO TRUSTEES

Representative Business Men, Interested in Education, Have Been Elected to Boards.

One of the principal reasons for the success of the local schools is the wise management of the representative business men who have been elected to the board of trustees. Fortunately each board has been composed of members who felt a deep personal interest in promoting the educational system of the city and have gladly given their time and attention to the school problems. The present school board is Dr. Wm. M. Casey, President; Leroy Miller, Secretary; and Benjamin F. Schneck, Treasurer.

The former Boards of Trustees were:

1871-1874.

P. L. Carter,
Joseph Kling,
Dr. J. W. F. Gerrish.

1874-1876.

P. L. Carter,
J. H. Andrews,
Joseph Kling.

1876-1880.

J. H. Andrews,
F. M. Swope,
P. L. Carter.

1880-1882.

J. H. Andrews,
A. P. Charles,
F. M. Swope.

1882-1885.

A. P. Charles,
E. H. Ahlbrand,
F. M. Swope.

1885-1887.

F. M. Swope, President;
C. C. Frey, Secretary;
A. P. Charles, Treasurer;

1887-1889.

C. C. Frey, President;
C. Leininger, Secretary;
A. P. Charles, Treasurer.

1889-1890.

J. H. Andrews, President;
C. Leininger, Secretary;
C. C. Frey, Treasurer;

1890-1891.

A. P. Charles, President;
J. H. Andrews,
C. C. Frey.

1891-1892.

C. C. Frey, President;
P. L. Carter, Secretary;
J. H. Andrews, Treasurer.

1892-1894.

P. L. Carter, President;
J. C. Hagerty, Secretary;
C. C. Frey, Treasurer;

1894-1896.

P. L. Carter, President;
C. C. Frey, Treasurer;

SEVENTEEN ON HONOR ROLL AT LAUREL STREET SCHOOL

Completed Year's Course Without Receiving Mark for Being Tardy or Absent.

Seventeen pupils at the Laurel Street school have been placed on the honor roll for 1914, having been neither absent nor tardy during the school year. All of the pupils did excellent work and were commended by their teachers. The year at the Laurel Street school has been very satisfactory and the teachers and patrons are pleased with the results.

Those who are given places on the honor roll are:

Lenore Thickston, Raymond Blumer, Harry Thompson, Freda Sierp, Esther Heiwig, Harvey Green, Frank Powers, Mercedes Parker, Lawrence Adams, Helen Prewitt, Melvin Hill, Bert Phillips, Henry Abbott, Edward Massman, Esther Phillips, Gladys Breitfield and Vivian Miller.

LOCAL MINISTER DELIVERS ADDRESS TO THE VETERANS

Fortieth Annual Celebration is Held Thursday at Silver Creek, Scott County—Historic Site.

Edward L. Pettus, pastor of the Christian church, delivered a Memorial address Thursday at Silver Creek, Scott county. A celebration is held there each year and this was the fortieth annual event. It is arranged in honor of the veterans of the civil war and is attended by hundreds of people in the community. Mr. Pettus delivered the address in the afternoon after a basket dinner had been served.

The site is historic in that within a few miles of the grounds stands an old Baptist church said to be the oldest in the state. Nearby is a cemetery which has been used as a burial ground since the late seventies. Within a short distance from the picnic grounds is the famous Pigeon Roost Monument which was erected in memory of the white men who lost their lives at the time of the Indian massacre.

SEYMOUR, - INDIANA

Dear Sir:

In the battle of life, appearance counts. It pays to dress well. Dressing well is exceedingly easy when you have the right kind of clothes to select from.

We assure you that at this store you will see the right clothes. If you will come to see them, we shall take genuine pleasure in showing them to you and should you want to buy, we can surely please you.

Our Spring and Summer gathering unites the latest and the greatest—the latest styles and the greatest values. It's an exposition of Style that will delight the eye of any man who will come to see.

To show these new goods is our greatest pleasure, for we know when a man is shown something that he likes at a price he wants to pay, he is sure to remember where to go for it when he gets ready to buy.

You can learn more about the clothes we sell in a few minutes spent looking them over and trying them on, than we could ever tell you. So we urge you to come and see them, try them on and see how you look in them.

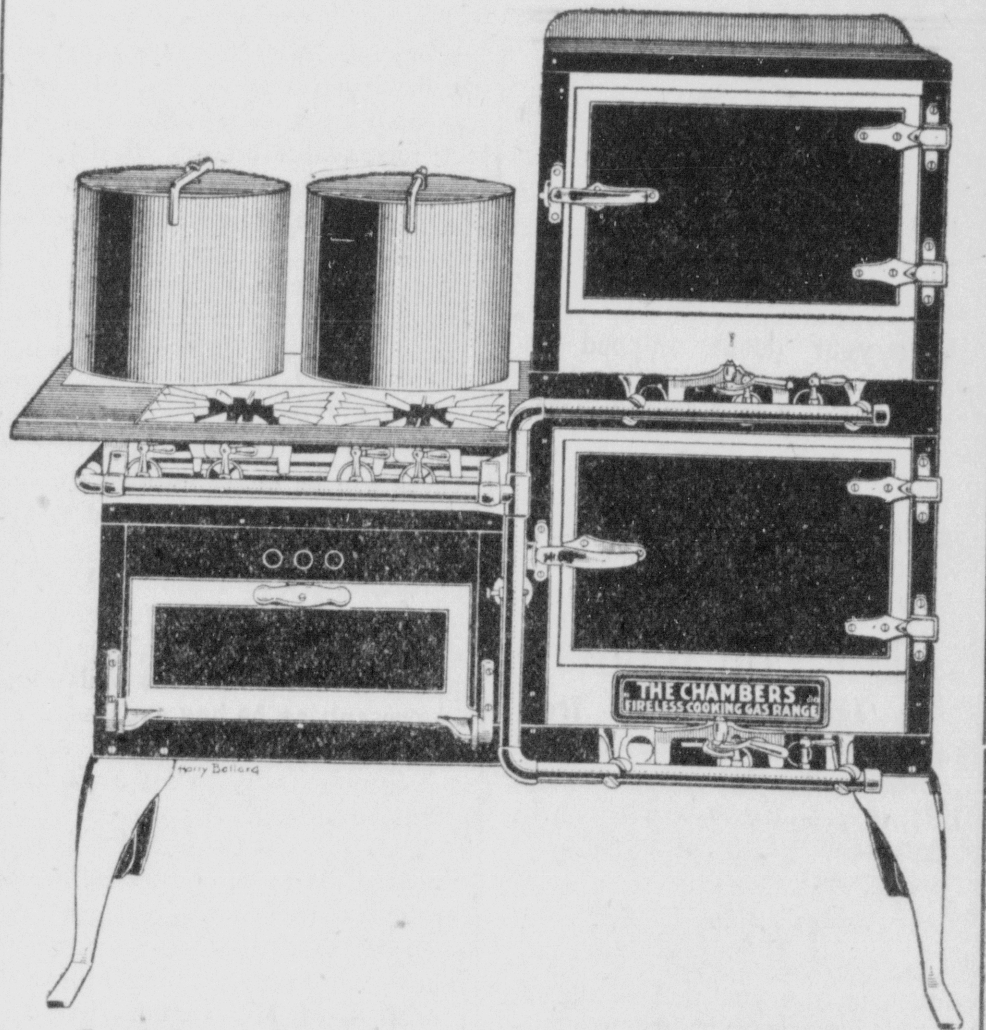

We would very much like to sell you your clothing, shoes and furnishings this spring. We are confident that if you call and inspect our offerings you will make up your mind that this is the store that gives the most for the least money—the most in style, the most in quality and the most in lasting satisfaction.

It pays to investigate. Are you going to? We hope so.

Yours very truly,

PHILADELPHIA BARGAIN STORE,
JOSEPH LEVIN, Mgr.

CHAMBERS' Fireless Gas Range

If Men Had to do the Cooking Every Home Would Have a Chambers Fireless Gas Range

It will do three-fifths of your cooking with the gas turned off.

Just start the cooking in the regular way, then turn the gas off and the Fireless part does the rest.

It means a cool kitchen, better food and a smaller gas bill.

CENTENNIAL WILL BE CELEBRATED

Notable Observance of Founding of
New Harmony Settlement Will
Begin Tomorrow.

ATTRACTED WORLD ATTENTION

Many Speakers of National Reputation Will Assist in Celebrating
Hundredth Anniversary.

By United Press.

New Harmony, Ind., May 29.—One week from tomorrow begins the most notable centennial celebration the state of Indiana has yet witnessed; one of the most notable, indeed, that have ever been held in the country. The founding of the village of New Harmony in June 10, 1814, by George Rapp and his colony of a thousand German communists, marked the beginning of a dozen years of social experimentation at this place which made the name of New Harmony known throughout the world.

With the landing of Rapp's colony New Harmony became at once the most populous town in the territory of Indiana. The estate of thirty thousand acres was quickly brought under cultivation, and here were erected factories and homes of brick and frame which still stand as a monument to the skill of their builders. The Harmonists built a trade extending from the upper Wabash to New Orleans, and are believed to have taken away nearly a million dollars with them when they left this locality for the vicinity of Pittsburgh upon the sale of the estate of Robert Owen.

The Rappites believed in the early coming of the end of the world and held all property in common, forbade marriage and practiced human brotherhood. The last of the Rappites died a few years ago, and the bulk of the property went to John Duss, the last trustee, whose skilful management saved the estate from bankruptcy in the last years of the society.

Duss is a famous New York bandmaster. He is sending to New Harmony many relics of the Rappite days, including a wagon built there in 1823. Duss himself will speak on the opening day of the centennial, June 6, when addresses also will be delivered by George C. Taylor, secretary of the commission, and George B. Lockwood of Muncie, who wrote the only authoritative volume on the history of New Harmony, published by the Appletons in 1902, and which rescued from comparative oblivion the remarkable history of the place.

Sunday, June 7th, will be given over to religious exercises, with a sermon by Dr. Ferd C. Ighart, one of the most prominent of New York ministers, formerly a resident of Evansville. On Monday, former President Taft will speak. This will be known as Owen Day.

Tuesday will be woman's day. There will be many notable speakers, including former Vice-President Fairbanks.

Wednesday is Indiana Day, and Governor Ralston, Senator Shively and Senator Kern will speak; it is possible that President Wilson may be present, as he has expressed great interest in the celebration and has taken under advisement an invitation to attend.

Thursday is Fraternal Day, and James E. Watson will be the principal speaker. Friday will be Posey County Day, and there will be a horse show and floral parade. Major G. V. Menzies, of Mt. Vernon, will speak. On Saturday, New Harmony will be visited by the Republican State Editorial Association party and it is probable that each of the three ex-Governors, who will accompany it, Wilson, of Kentucky, Deneen, of Illinois, and Durbin, of Indiana, will speak. The centennial will conclude with a children's pageant representing scenes in the history of New Harmony, under the direction of Miss Charity Dyne, of Indianapolis. Several hundred children will participate.

It is expected that thousands of visitors will be attracted to New Harmony during the week, homecomers and visitors interested in the history of the picturesque place. A concert band from Decatur, Ill., will give daily concerts, and there will be many social events.

Horace P. Owen, the most prominent surviving member of the famous Owen family, who was president of the Centennial commission, died while the plans for the celebration were being laid. The Owens were possibly the most remarkable of all Indiana families. Robert Owen, who bought the New Harmony estate from the

Rappites and made there his world-famous experiments in economics and education, is called "the father of English socialism." His son, Robert Dale Owen, won national fame as a political leader and social reformer. Richard Dale Owen was famous as a soldier and scientist, and David Hale Owen, United States Geologist. Through the Owens, New Harmony became the scene of the most ambitious attempt at social reconstruction the world has yet witnessed, and while it failed in its main purpose, its influence as an educational, political and scientific center has profoundly affected the history not only of Indiana but of the nation.

While New Harmony is a town of only 1,400 people, fifteen thousand dollars was easily raised locally to meet the expenses of the celebration.

GREATEST ENGLISH SHIP STARTS ON MAIDEN TRIP

Aquitania, Luxuriously Equipped,
Will Not Attempt to Break Speed
Records as Did the Titanic.

By United Press.

Liverpool, May 29.—The giant Cunarder, Aquitania, Britain's largest liner and the world's most luxurious ship, sails tomorrow on her maiden voyage to New York. The liner, which cost roughly \$10,000,000 to build, is 901 feet long, 97 feet broad, and her gross tonnage is 47,000 tons. Although she will share the mail service with the Mauretania and the Lusitania, the Aquitania will not try to beat the records of her speedy sisters, but will content herself with a comparatively modest 23 knots per hour.

Accommodation is provided for 3,500 passengers and a crew of 1,000. Warned by the Titanic disaster the designers have allotted boats for all. A new feature is the provision of two powerful motor launches* which if necessary can tow the ordinary lifeboats. Each is fitted with a 300-mile range wireless installation in case of accident to the liner's main apparatus. The Aquitania is two ships in one, for the inner shell is separated from the outer shell by fifteen feet, which with a new system of watertight compartments, is reckoned to make the vessel unsinkable.

All modern luxuries such as drawing rooms, lounges, smoking room, verandah cafes, foyers, restaurants, grill room, swimming bath and gymnasium, are provided, but the particular pride of the Aquitania is the Long Gallery, which runs from the smoking room to the lounging room and is a veritable museum and art gallery. It is 150 feet long and is paneled in mahogany and painted a delicate green. Walls and show cases display exhibits of jewelry, china, lace-work, costly prints and paintings and other objects of art. There is also a theatre and during the voyage music hall and theatrical stars will give several performances a week. Tonight a star company including Barclay Gammon, George Robey, Arthur Prince and Miss Violet Essex will participate in a premiere, and in future, footlight favorites will be able to save part of their passage money by booking engagements during the voyage.

Child Cross? Feverish? Sick?
A cross, peevish, listless child, with coated tongue, pale, doesn't sleep; eats sometimes very little, then again ravenously; stomach sour; breath fetid; pains in stomach, with diarrhea; grinds teeth while asleep, and starts up with terror—all suggest a Worm Killer—something that expels worms, and almost every child has them. Kickapoo Worm Killer is needed. Get a box today. Start at once. You won't have to coax, as Kickapoo Worm Killer is a candy confection. Expels the worms, the cause of your child's trouble. 25c. Intercollegiates at Harvard.

By United Press.

Boston, May 29.—The cream of college athletes of the country today competed in the preliminary events of the annual intercollegiate field and track games in Harvard Stadium on Soldiers Field. This was the second successive year that the big event has come to the Crimson. This year's scoring will be different from that of last year. First will count 5; seconds 4; thirds 3; fourths 2 and fifths 1. This year's events are in a way the most important since the intercollegiates began. Pennsylvania and Cornell each have four victories to their credits in former meets, and the coveted championship cup which becomes the permanent property of the team winning it five times, may become the property of either the Ithacans or the Quakers when the count is totaled tomorrow evening.

Rengo Belt

Corsets

are especially
made to Reduce
Stout and
Medium Figures

The new 1914 models are exquisite examples of the new figure lines with low bust and medium length—they will prove a revelation to women who have found nothing but discomfort in all other reducing corsets. Rengo Belt corsets are strong—in this respect they surpass corsets which bulge and stretch and lose their shape. They have elastic webbing placed exactly where it is needed and so they give freedom for dancing and active exercise—they are not cumbersome or trying on the nerves. Boned with double watch spring steels—very flexible but unbreakable—and guaranteed not to rust.

MOLLYCODDLE LAXATIVES

Can Not and Do Not Touch the Liver

They may clear out the intestinal tract, but do not relieve the damaged-up bile. Years ago May Apple Root (called Podophyllin) was a last-resort bile starter. It gripped fearfully, but brought out the bile. Podophyllin with the gripe taken out is now to be had under the name

PODOJAX

Sold by Rucker's Drug Store.

WE ARE MUCH INCLINED TO FRILLS AND FLOUNCES THIS SPRING

Summer frocks are sheer to a degree and are frilled and flounced in a way to bring joy to feminine hearts. The flower-strewn crêpes are much in demand, also voiles, lingerie, laces and nets. The soft silks are used too and are often combined with lace and net as in this instance is 8367; the dress itself is fashioned of crêpe de Chine and the frills on the skirt and sleeves are set on under bands of embroidered organdy. Many dancing frocks show embroidered organdy flouncing, and laces and nets are used for trimming the smartest frocks and gowns.

This dress is suitable for dancing or afternoon wear; it has a kimono bodice slightly gathered along the V-shaped neck, and an upstanding collar. This dress may be copied in size 26, with 4 1/4 yards of 36-inch material.

Another attractive combination of net and a contrasting material is shown in the second gown, 8355; a plain cotton voile in a soft shade of yellow is trimmed with a fichu of dotted ecru net and the two flounces on the skirt are also of the net. The bolero effect on the bodice is new and attractive and a pleasing note is given by the sash and collar of black. This dress requires for size 36, 5 1/2 yards of 36-inch material.

The young girl's frock shown in No. 8350 is fashioned of flowered crêpe and trimmed with frills of embroidered batiste. For a girl of 12 this design requires 2 1/2 yards of 36-inch material.

No. 8367—sizes 34 to 42.
No. 8355—sizes 34 to 42.
No. 8350—sizes 10 to 14.
Each pattern 15 cents.

These patterns for sale by the Racket Store. L. F. Miller.

The Story of Waitstill Baxter

CHAPTER XVIII.

The Rod That Blossomed.

IVORY BOYNTON had taken the horse and gone to the village on an errand, a rare thing for him to do after dark, so Rod was thinking as he sat in the living room learning his Sunday school lesson on the same evening that the men were gossiping at the brick store. His aunt had required him from the time when he was proficient enough to do so to read at least a part of a chapter in the Bible every night. Beginning with Genesis, he had reached Leviticus and had made up his mind that the Bible was a much more difficult book than "Scottish Chiefs" notwithstanding the fact that Ivory helped him over most of the hard places. At the present juncture he was vastly interested in the subject of "rods" as unfolded in the book of Exodus, which was being studied by his Sunday school class. What added to the excitement was the fact that his uncle's Christian name, Aaron, kept appearing in the chronicle as frequently as that of the great law-giver Moses himself, and there were many verses about the wonder-working rods of Moses and Aaron that had a strange effect upon the boy's ear when he read them aloud, as he loved to do whenever he was left alone for a time. When his aunt was in the room his instinct kept him from doing this, for the mere mention of the name of Aaron, he feared, might sadden his aunt and provoke in her that dangerous vein of reminiscence that made Ivory so anxious.

"It kind of makes me nervous to be named Rod, Aunt Boynton," said the boy, looking up from the Bible. "All the rods in these Exodus chapters do such dreadful things! They become serpents, and one of them swallows up all the others, and Moses smites the waters with a rod, and they become blood, and the people can't drink the water and the fish die! Then they stretch a rod across the streams and ponds and bring a plague of frogs over the land, with swarms of flies and horrible insects."

"That was to show God's power to Pharaoh and melt his hard heart to obedience and reverence," explained Mrs. Boynton, who had known the Bible from cover to cover in her youth and could still give chapter and verse for hundreds of her favorite passages.

"It took an awful lot of melting, Pharaoh's heart!" exclaimed the boy. "Pharaoh must have been worse than Deacon Baxter! I wonder if they ever tried to make him good by being kind to him! I've read and read, but I can't find they used anything on him but plagues and famines and boils and pestilences and thunder and hail and fire! Have I got a middle name, Aunt Boynton, for I don't like Rod very much?"

"I never heard that you had a middle name; you must ask Ivory," said his aunt abstractedly.

"Did my father name me Rod, or my mother?"

"I don't really know. Perhaps it was your mother, but don't ask questions, please."

"I forgot, Aunt Boynton! Yes, I think perhaps my mother named me. Mothers 'most always name their babies, don't they? My mother wasn't like you, she looked just like the picture of Pocahontas in my history. She never knew about these Bible rods, I guess."

"When you go a little further you will find pleasant things about rods," said his aunt, knitting, knitting intensely, as was her habit, and talking as if her mind were 1,000 miles away. "You know they were just little branches of trees, and it was only God's power that made them wonderful in any way."

"Oh! I thought they were like the singing teacher's stick he keeps time with."

"No; if you look at your concordance you'll find it gives you a chapter in Numbers where there's something beautiful about rods. I have forgotten the place. It has been many years since I looked at it. Find it and read it aloud to me." The boy searched his concordance and readily found the reference in the 17th chapter of Numbers. "Stand near me and read," said Mrs. Boynton. "I like to hear the Bible read aloud!"

Rodman took his Bible and read, slowly and haltingly, but with clearness and understanding:

"1. And the Lord spake unto Moses, saying,

"2. Speak unto the children of Israel, and take of every one of them a rod according to the house of their fathers, of all their princes according to the house of their fathers twelve rods; write thou every man's name upon his rod."

Through the boy's mind there darted the flash of a thought, a sad thought. He himself was a Rod on whom no man's name seemed to be written, orphan that he was, with no knowledge of his parents!

Suddenly he hesitated, for he had caught sight of the name of Aaron in the verse that he was about to read

and did not wish to pronounce it in his aunt's hearing.

"This chapter is most too hard" for me to read out loud, Aunt Boynton," he stammered. "Can I study it by myself and read it to Ivory first?"

"Go on, go on, you read very sweetly. I cannot remember what comes and I wish to hear it."

The boy continued, but without raising his eyes from the Bible:

"3. And thou shalt write Aaron's name upon the rod of Levi: for one rod shall be for the head of the house of their fathers."

"4. And thou shalt lay them up in the tabernacle of the congregation before the testimony, where I will meet with you."

"5. And it shall come to pass that the man's rod, whom I shall choose,

Rodman Took His Bible and Read.

shall blossom; and I will make to cease from me the murmurings of the children of Israel, whereby they murmur against you."

Rodman had read on, absorbed in the story and the picture it presented to his imagination. He liked the idea of all the princes having a rod according to the house of their fathers. He liked to think of the little branches being laid on the altar in the tabernacle, and above all he thought of the longing of each of the princes to have his own rod chosen for the blossoming.

"6. And Moses spoke unto the children of Israel, and every one of their princes gave him a rod apiece, for each prince one, according to their father's houses; even twelve rods; and the rod of Aaron was among their rods."

Oh! how the boy hoped that Aaron's branch would be the one chosen to blossom! He felt that his aunt would be pleased, too, but he read on steadily, with eyes that glowed and breath that came and went in a very palpitation of interest:

"7. And Moses laid up the rods before the Lord in the tabernacle of witness."

"8. And it came to pass, that on the morrow Moses went into the tabernacle of witness; and, behold, the rod of Aaron was budded and brought forth buds, and bloomed blossoms, and yielded almonds."

It was Aaron's rod, then, and was an almond branch! How beautiful, for the blossoms would have been pink; and how the people must have marvelled to see the lovely blooming thing on the dark altar, first budding, then blossoming, then bearing nuts! And what was the rod chosen for? He hurried on to the next verse:

"9. And Moses brought out all the rods from before the Lord unto all the children of Israel; and they looked, and took every man his rod."

"10. And the Lord said unto Moses, Bring Aaron's rod again before the testimony to be kept for a token against the rebels; and thou shalt quite take away their murmurings from me, that they die not."

"Oh, Aunt Boynton," cried the boy, "I love my name after I've heard about the almond rod! Aren't you proud that it's uncle's name that was written on the one that blossomed?"

He turned swiftly to find that his aunt's knitting had slipped on the floor; her nerveless hands drooped by her side as if there were no life in them, and her head had fallen against the back of her chair. The boy was paralyzed with fear at the sight of her closed eyes and the deathly pallor of her face. He had never seen her like this before, and Ivory was away. He flew for a bottle of spirit, always kept in the kitchen cupboard for emergencies, and throwing wood on the fire in passing, he swung the crane so that the tea kettle was over the flame. He knew only the humble remedies that he had seen used here or there in illness and tried them timidly, praying every moment that he might hear Ivory's step. He warmed a soapstone in the embers and, taking off Mrs. Boynton's shoes, put it under her cold feet. He chafed her hands and gently poured a spoonful of brandy between her pale lips. Then, sprinkling camphor on a handkerchief, he held it to her nostrils, and to his joy she stirred in her chair; before many minutes her lids fluttered, her lips moved, and she put her hand to her heart.

"Are you better, aunt dear?" Rod asked in a very wavering and fearful voice.

She did not answer; she only opened her eyes and looked at him. At length she whispered faintly, "I want Ivory; I want my son."

"He's out, aunt dear. Shall I help you to bed the way Ivory does? If you'll let me, then I'll run to the bridge 'cross lots like lightning and bring him back."

She assented and, leaning heavily on his slender shoulder, walked feebly into her bedroom off the living room. Rod was as gentle as a mother, and he was familiar with all the little offices that could be of any comfort—the soapstone warmed again for her feet, the bringing of her nightgown from the closet and when she was in bed another spoonful of brandy in hot milk; then the camphor by her side, an extra homespun blanket over her and the door left open so that she could see the open fire that he made into a cheerful huddle, contrived so that it would not snap and throw out dangerous sparks in his absence.

All the while he was doing this Mrs. Boynton lay quietly in the bed talking to herself fitfully in the faint murmuring tone that was habitual to her. "He could distinguish scarcely anything, only enough to guess that her mind was still on the Bible story that he was reading to her when she fainted. "The rod of Aaron was among the other rods," he heard her say, and a moment later, "Bring Aaron's rod again before the testimony."

Was it his uncle's name that had so affected her? wondered the boy, almost sick with remorse, although he had tried his best to evade her command to read the chapter aloud. What would Ivory, his hero, his pattern and example, say? It had always been Rod's pride to carry his little share of every burden that fell to Ivory, to be faithful and helpful in every task given to him. He could walk through fire without flinching, he thought, if Ivory told him to, and he only prayed that he might not be held responsible for this new calamity.

"I want Ivory!" came in a feeble voice from the bedroom.

"Does your side ache worse?" Rod asked, tiptoeing to the door.

"No, I am quite free from pain."

"Would you be afraid to stay alone just for a while if I lock both doors and run to find Ivory and bring him back?"

"No. I will sleep," she whispered,

closing her eyes. "Bring him quickly before I forget what I want to say to him."

Rod sped down the lane and over the fields to the brick store where Ivory usually bought his groceries. His cousin was not there, but one of the men came out and offered to take his horse and drive over the bridge to see if he were at one of the neighbors' on that side of the river. Not a word did Rod breathe of his aunt's illness; he simply said that she was lonesome for Ivory, and so he came to find him. In five minutes they saw the Boynton horse hitched to a tree by the roadside, and in a trice Rod called him and, thanking Mr. Bixby, got into Ivory's wagon to wait for him. He tried his best to explain the situation as they drove along, but finally concluded by saying: "Aunt really made me read the chapter to her, Ivory. I tried not to when I saw uncle's name in most every verse, but I couldn't help it."

"Of course you couldn't! Now you jump out and hitch the horse while I run in and see that nothing has happened while she's been left alone. Perhaps you'll have to go for Dr. Perry."

Ivory went in with fear and trembling, for there was no sound save the ticking of the tall clock. The fire burned low upon the hearth, and the door was open into his mother's room. He lifted a candle that Rod had left ready on the table and stole softly to her bedside. She was sleeping like a child, but exhaustion showed itself in every line of her face. He felt her hands and feet and found the soapstone in the bed, saw the brandy bottle and the remains of a cup of milk on the light stand, noted the handkerchief, still strong of camphor, on the counterpane and the blanket spread carefully over her knees, and then turned approvingly to meet Rod stealing into the room on tiptoe, his eyes big with fear.

"We won't wake her, Rod. I'll watch awhile, then sleep on the sitting room lounge."

"Let me watch, Ivory! I'd feel better if you'd let me, honest I would!"

The boy's face was drawn with anxiety. Ivory's attention was attracted by the wistful eyes and the beauty of the forehead under the dark hair. He seemed something more than the child of yesterday—a care and responsibility and expense for all his loving obedience; he seemed all at once different tonight—older, more dependable, more trustworthy—in fact, a positive comfort and help in time of trouble.

"I did the best I knew how. Was anything wrong?" asked the boy, as Ivory stood regarding him with a friendly smile.

"Nothing wrong, Rod! Dr. Perry couldn't have done any better with what you had on hand. I don't know how I should get along without you, boy!" Here Ivory patted Rod's shoulder. "You're not a child any longer, Rod; you're a man and a brother, that's what you are, and to prove it I'll take the first watch and call you up at 1 o'clock to take the second so that I can be ready for my school work tomorrow. How does that suit you?"

"Tiptop!" said the boy, flushing with pride. "I'll lie down with my clothes on; it's only 9 o'clock and I'll get four hours' sleep; that's a lot more than Napoleon used to have."

He carried the Bible upstairs and just before he blew out his candle he looked again at the chapter in Numbers, thinking he would show it to Ivory privately next day. Again the story enchanted him, and again, like a child, he puts his own name and his living self among the rods in the tabernacle.

"Ivory would be the prince of our house," he thought. "Oh, how I'd like to be Ivory's rod and have it be the one that was chosen to blossom and keep the rebels from murmuring!"

TAKE THIS MAN'S ADVICE.

Try the Great Kidney Remedy

It always gives me pleasure to recommend anything that is right and so I feel it my duty to herald the praises of Dr. Kilmer's Swamp Root.

For years I was troubled with kidney disease and it was so intense that I was bedridden for days at a time. I gave up all hope and doctors for miles around gave me no help. Incidentally I tried several patent remedies and at last tried Swamp Root. From the first it gave me relief and it was no time before I was able to be up and around and now I am perfectly well and able to work as I used to before my terrible sickness.

So now let me thank you for your wonderful discovery and take this opportunity to recommend it to all who suffer from kidney troubles.

Yours very truly,

WALTER SHIVER.

Hope, Ark.

Subscribed and sworn to before me, this 25th of March, 1912.

Letter to Dr. Kilmer & Co., Binghamton, N. Y.

Prove What Swamp-Root Will Do For You.

Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention the Seymour Daily Republican. Regular fifty-cent and one-dollar size bottles for sale at all drug stores.

M14

FRECKLES

Don't Hide Them With a Veil; Remove Them With the Othine Prescription.

This prescription for the removal of freckles was written by a prominent physician and is usually so successful in removing freckles and giving a clear, beautiful complexion that it is sold by druggists under guarantee to refund the money if it fails.

Don't hide your freckles under a veil; get an ounce of othine and remove them. Even the first few applications should show a wonderful improvement, some of the lighter freckles vanishing entirely.

Be sure to ask the druggist for the double strength othine; it is this that is sold on the money-back guarantee.

Remember THAT A. Sciarra

the Jackson County Ladies' and Gents' Tailor Cleaner, is back again. Now located at 16 Indianapolis avenue, Hargrove's old place, with an up-to-date line of all-wool styles for your home-made Spring Suits, \$20.00 and up.

Chicago made, \$11.50 and up.

French Steam Dry Cleaning, Pressing, Altering, etc.

Cleaning, Pressing and Blocking all kinds of Felt, Panama and Straw Hats.

Your patronage solicited. Be sure to come to the right place.

SPECIAL TO WOMEN

The most economical, cleansing and germicidal of all antiseptics is

Paxtine

A soluble Antiseptic Powder to be dissolved in water as needed.

As a medicinal antiseptic for douches in treating catarrh, inflammation or ulceration of nose, throat, and that caused by feminine ills it has no equal. For ten years the Lydia E. Pinkham Medicine Co. has recommended Paxtine in their private correspondence with women, which proves its superiority. Women who have been cured say it is "worth its weight in gold." At druggists, 50c. large box, or by mail, The Paxton Toilet Co., Boston, Mass.

MANY SPEAKERS OF WIDE REPUTATION ON PROGRAM

Prominent Sunday School Workers Will Participate in Convention at Indianapolis in June.

Annual Sunday School convention, which will convene in Indianapolis, June 16th to 18th, will have on its program a list of speakers which would be difficult to equal. Most of them are well known in Indiana.

The program will include three workers from the International Sunday school staff. Marion Lawrence, general secretary, and probably the best known Sunday School worker on the continent; W. C. Pearce, leader of the organized Adult Class work in America, will bring his usual stirring message for men and women. Franklin McElfresh, Superintendent of Teacher Training work in the interdenominational field, will also appear on the program. Besides the international speakers there will be Dr. Cornelius Woolfkin, pastor of the Cornwell Fifth Ave., and Calvary Baptist churches, who was received so enthusiastically two years ago at the Richmond Convention; Prof. R. B. von Klein Smid, Superintendent of the Educational Department in DePaul and also associate superintendent of the Jeffersonville Reformatory; and Mrs. Maud J. Baldwin, Elementary Superintendent of the Pennsylvania Sunday School Association, who held a similar position in this state for five years.

The music of the convention will be in charge of Prof. E. O. Excell and his able assistant, Prof. Alvin Roper. Neither of these need an introduction to an Indiana audience. They have, for a number of years, been a prominent feature of the Sunday School Conventions and their popularity instead of waning is, if possible, increasing.

For more minute information concerning any of these write the Indiana Sunday School Association, 417 Law Bldg., Indianapolis, Ind.

Don't Forget.

The auto excursion Monday night by the Fortnightly club of the Baptist church. Proceeds for expense of brick street and furnaces. Cars will leave the Public Service from 5 to 11 p. m. Refreshments will be served at the Public Service.

Stutz and Studebaker cars and a number of other autos will be in the Auto excursion Monday. Adults tickets 20c; children under ten years, 10c. Start from Public Service office 5 to 11 p. m.

Take a ride in the Studebaker auto, for which Bevins and Company are agents, Monday in the Auto excursion.

Cinders free for the hauling at Ebner Ice Plant. j1d-m28w

See the Decoration Day baseball game at Austin tomorrow.

SAFETY RULES FOR VACATION

Practical Advice on Camping. Don't Take Too Much.

WHAT YOU CAN'T DO WITHOUT

Personnel of the Party Is Important Consideration—Precautionary Measures to Guard Against Accidents In the Woods—How to Tow a Drowning Person by Using Various Holds.

With the approach of vacation season and the popularity of camping parties the appended advice and suggestions are of timely value.

The primary mistake of the novice at camping is that he takes too much. A cooking outfit for two should consist of a frying pan with detachable handle, coffee pot, enameled ware kettle, large spoon, hunting knife and fork. For table service carry three enameled ware plates or dishes about an inch and a half deep, two large cups of the same material, two knives, two forks and two spoons. The plates are deep enough to hold soup or chowder.

The outfit should always include a small ditty bag, containing thread, needles, pins, court plaster, buttons, stout twine and a small pair of scissors.

In camp a doctor is seldom available, so take a medicine chest along.

Your Camping Friends.

The personnel of a camping party for the mountains is a most important consideration. They should all be thoroughly well acquainted and absolutely congenial in spirit. A camp far in the woods is no place to become acquainted with any one. If he develop unpleasant traits you can't get away from him.

No matter how good a friend a person may be of yours, don't take him in camp with you if he is a "kicker." A man who will shirk or grumble at any duty he is assigned to about a camp will set an entire party by the ears all most before the tent is up.

Don't have with you the fellow who is always on the watch for an opportunity to get the best of everything, from the brownest trout at breakfast to the most advantageous corner at bedtime. Then there is the man who is always in unseemly haste to get at the creek or lake first with his rod. Don't have too many in your party.

Four men, en rapport, make the ideal camp.

Here's a tip to the wise, the cooking wise—build a small fire for enlivening. With a large fire the heat becomes unbearable when you get near enough to manage the pans and kettles. Food burns before it is properly cooked. The surface of the frying pan heats unevenly. But with your little fire, with its clear flame, you can do what you will. The pancakes brown to a nicety. The bacon sizzles merrily with no danger that the flame will leap into the pan.

To Tow Drowning Person.

To tow a drowning person to safety the easiest method is to hold the back of the head well down and swim on the back with a leg kick, keeping the subject in a horizontal position.

Should he begin to twist and turn change to a position so that you hold him around his chest with his head on your chest and you still continue to swim on your back. This is the hardest but safest method, as it is impossible for the subject to clutch the rescuer, a contingency that by every means must be prevented, as a frightened person is never to be trifled with. Sometimes he will sink not only the nails, but the fingers, into the flesh.

If the subject is amenable to reason one may, when tired of this position, turn on the side and try the side stroke, placing the upper arm under the subject's armpit, still keeping him on his back.

An easy way to save an educated swimmer who has become exhausted is to have the latter lie on his back. With stiff elbows he simply keeps his open hands on the rescuer's shoulders as the rescuer pushes him toward shore. It should not be tried if the subject himself has not confidence in the water.

Safety First For Hunters.

Always keep the gun pointed from yourself and other persons.

In getting over logs and fences always see that the gun is first put over and in a solid position where it will not fall. Then go to another place to climb over.

Do not shoot into moving bushes or in the direction of a noise without being sure the desired game is there and seeing it for a certainty.

If you are going for fun only, it is all right to take inexperienced friends, a well filled lunch basket, literature and a target and go to the nearest grove. If you are going for game go alone or with experienced hunters only; carry what is essential; hunt with the back to the sun.

School For Foreign Employees.

The Bayonne (N. J.) board of education and the officials of the Standard Oil and General Chemical companies, which have large plants in Bayonne, are co-operating to teach English to their foreign employees. The companies will furnish the classrooms and the city the instructors. The men will be allowed to attend the classes in the daytime.

NEWSY PARAGRAPHS.

Mrs. D. L. Robeson was admitted to the Schneck hospital this morning. She has been ill since Monday with pneumonia.

Mrs. Walter Harris shipped her household goods to Hamilton, O., today where she and the children will leave in a few days to join Mr. Harris. Mr. Harris has a position with the C. H. & D. road there.

Frank Gilbert, a conductor on the B. & O. S-W. Branch, who was granted a leave of absence for several months, and has been conducting a restaurant at Mitchell, has sold his business and resumed his run.

Mrs. Will Suerman, wife of Will Suerman, died Thursday evening at the hospital in Cincinnati following a serious operation. The husband and a two months' old babe survive. Mrs. Suerman's home was in Aurora where the remains will be taken for burial. They formerly lived in this city.

SOCIAL EVENTS.

BIRTHDAY SURPRISE.

Yesterday was the ninth birthday anniversary of Ernest Ley and he was given a pleasant surprise by a number of his little friends at his home, 218 Brown street. An enjoyable evening was spent and he received many remembrances from his little friends.

Those present were Francis Misch, Howard Hainersperger, Francis Riehart, Raymond Hoeferkamp, Henry Ley, Clarence and Charles Otis, Riley Sprenger, Glen Layhu and Francis Schultheis.

STEAMER SINKS: 700 PASSENGERS BELIEVED LOST

(Continued from first page)

Christiania, Norway. She is a single screw vessel and is loaded with coal. She carries a crew of fifty men.

The disaster recalls the accident to the sister ship of the ill-fated vessel, the Empress of Britain, which two years ago rammed and sank the collier Helvetia in almost the same spot that the collision took place this morning.

The Empress of Ireland's wireless sent out a few "S. O. S." signals, enough to send the Canadian government steamer Eureka, and the mail steamer, Lady Evelyn, to the rescue, and then her message ceased. It was afterward learned that the big passenger steamer sank ten minutes after the collision.

STORM OF RESENTMENT HEARD FROM VETERANS

G. A. R. Members Believe That President Wilson Should Have Addressed Union Men.

(Special to Seymour Republican)

Washington, May 29.—The storm of resentment in the Grand Army of the Republic against President Wilson because he has excused himself from attending the Decoration Day exercises at the Arlington National Cemetery, but has agreed to speak at the Confederate memorial exercises five days later, has assumed serious proportions.

The veteran soldiers of the Union see in the President's discrimination a deliberate slight against their organization and their honorable war records. A year ago he was invited to participate in the exercises and promised to attend if it was convenient for him to do so. He went automobile riding instead.

President Wilson is the first President to refuse to participate in the exercises since the custom of holding a memorial over the graves of the Union soldiers had its beginning soon after the war.

The effect of the President's refusal to attend the Grand Army exercises will not be confined to the Grand Army men. It will frustrate the plans of the Committee on Arrangements for the Confederate exercises a few days later to make the event a great reunion of the "Blue and the Gray." It was originally the intention of the Grand Army men to attend the Confederate gathering in force, but since the President has for the second time declined their invitation to attend the Decoration Day exercises they have announced they will not take part in the exercises at the unveiling of the Confederate monument.

Miss Lora Reynolds will go to Indianapolis Saturday morning to visit friends and attend the auto races.

Mrs. Mary French, of Aurora, visited her parents here Thursday and returned to her home this morning.

Phone 570 for Ice. John Morton.

PROPOSALS FILED BY CONTACTORS

(Continued from first page)

Nutter Gearwood Company. This concern is contemplating the establishment of a factory in this city and desires to purchase the city property.

Steinwedel also offered a resolution confirming the preliminary resolution providing for the improvement of West Seventh street from Chestnut to Pine street. The resolution was adopted without a dissenting vote. There were no remonstrances to the proposed improvement.

The street commissioner, Joseph C. Brown, filed his report showing the cost of the work in his department.

Mayor Ross officially gave notice that he had vetoed the resolution providing for the appointment of a local attorney to assist in the prosecution of the cases now pending before the Indiana Public Service Commission. In returning the resolution to the council the Mayor said in his opinion legal help should have been employed three months ago when the committee was appointed so the attorneys could have ample time to prepare for the case.

The mayor said it was his opinion that in employing an attorney one should be selected that had specialized in contracts and franchises. He said the franchise of the water company was drafted by exceptionally able contract attorneys. He recalled that it withstood the test of the Indiana Supreme court. The statement and veto were filed with the city clerk.

The council will meet in an adjourned session Monday night immediately after the close of the board of works meeting.

DRS. RADER and RADER RETURN TO SEYMOUR

We are pleased to welcome the return of Drs. Rader and Rader to Seymour where they practiced for a year and returned to the Parent School of Osteopathy at Kirksville, and completed their three years' course. Among the professional life of Seymour none stood higher than Drs. Rader and Rader.

They need no introduction to the people of this community where their praiseworthy work is evidenced by kindly expressions of all who were handicapped with ill health and came under their skillful treatment. They have risen steadily in their chosen profession and hold the confidence and esteem of everyone.

Their wide experience and splendid ability as associates with Dr. Spaulhurst commend them to those who suffer and are not improving under present treatment. Seymour is to be congratulated on the return of these skillful physicians and high class citizens.

m30d

Card of Thanks.

We desire to express our sincere thanks to our neighbors and friends for the kindness and sympathy shown us during the illness, death and burial of our dear mother and grandmother, Mrs. Sarah Smith; also Rev. M. E. Prather, the choir, Frank J. Voss and those who sent the beautiful floral offerings. Their kindness will always be appreciated.

Children and Grandchildren.

Special Traction Service.

The Interstate Public Service Co. will carry passengers on the mail car due to leave Seymour at 5:10 a. m. Decoration Day. Same to be run as a limited car.

m29d Chas. D. Hardin, Agt.

Notice Baptist Choir.

On account of the Alumni Friday night the choir will meet at the church Saturday night at 7:30 for rehearsal. All members are urged to be present.

DIVORCE YOURSELF From Dirt, Dust and Drudgery

by using a **Duntley**

Combination Pneumatic Sweeper

Release from broom drudgery—from the strain of moving and lifting furniture and from the dangerous scattering of dust and germs that are raised by the use of the broom and the old fashioned carpet sweeper, can be attained by the use of the **Duntley Combination Pneumatic Sweeper**, which, although easily operated by hand, creates powerful suction force which draws out all the dirt and dust found in your rugs and carpets and at the same time the revolving brush picks up all lint, pins, threads, ravelings, etc.

THE DUNTLEY SWEEPERS are made in three sizes and sold under a rigid guarantee for one year. You may try a Duntley in your own home for 10 days Free of Charge.
